

EPA's new Lead and Copper Rule requires water systems to remove lead service lines from the water system. To meet the new requirements, the water system must identify and have record of all water lines in the system including the customer's private lines. The state of West Virginia has given the water system until October 16, 2024 to complete the inventory of all water lines. With your help, we hope to complete this requirement well before the deadline. The questionnaire below will help us to identify and record this data.

**Please submit this information by calling or faxing our office:
304-472-1904/Fax 304-472-7685**

**or by returning this card to Hodgesville PSD:
188 Fayette Street, Buckhannon, WV 26201**

1. Physical Address: _____
2. What year was your home built? _____
3. Were the water lines ever replaced? _____ If yes, what year? _____
4. What type of water line is in the home? Pex/Plastic Copper Unknown

Note: If the pipe in your home is grey metal we must determine if it is Galvanized Steel or Lead.

If you scratch it with a screwdriver and it's hard, check here

If you scratch it with a screwdriver and it's soft and shiny when scratched, check here

5. Was the Private Service Line (water line between the home and water meter) ever replaced? _____
If yes, what year? _____ and what type of pipe was used? Plastic Copper
