KitKat Launcher is a launcher for Android terminals that gives your device a much more modern touchscreen, thanks to some features of the new Android 4.4 operating system. Among the main features of KitKat Launcher you'll find the ability to customize your desktop to small details by adding lots of widgets, easily creating folders, or putting up the latest wallpapers that come with the new Nexus 5 devices. Also, unlike other similar launchers, this KitKat Launcher allows you to make the top and bottom bars of your phone translucent, provided that you already have Android 4.4 installed. (However, this feature may not work on some devices.) KitKat Launcher is both quite practical and highly elegant. All the benefits of the launcher come together to make the experience of using the device much smoother and cooler. Keep KitKat Launcher updated with Uptodown APP About this version of Uptodown is currently on maintenance. We'll be back soon. Free8.39 MB Continue the app Get Android 4.4 on any device with KitKat Launcher! KitKat Launcher is a home replacement app designed to give you the look of the new Android 4.4 Update.
