3ds max maxscript auto-load script error

Hello @StephenMF, it's interesting. Could you list your 3ds Max version and the updates version that you use here? To analyze MAXScript errors after running 3ds max, go to the Utility tab - MAXScript - Open Listener. When the Listener window appears, pay attention to the message inside. The message should give users more information about what's in the 3ds max scene file causing the problem. For example, the error MAXScript - Error type: expands: requires MAXClass, received: uncertain. Could you how to get all this message into the post for me please? Thank you! Best Relationship, Page 2 Hi @StephenMF, I wonder. Could you list your 3ds Max version and the updates version that you use here? To analyze MAXScript errors after running 3ds max, go to the Utility tab - MAXScript - Open Listener. When the Listener window appears, pay attention to the message inside. The message should give users more information about what's in the 3ds max scene file causing the problem. For example, the error MAXScript - Error type: expands: requires MAXClass, received: uncertain. Could you how to get all this message into the post for me please? Thank you! For example, the error MAXScript - Error type: expands: requires MAXClass, received: uncertain. Could you how to get all this message into the post for me please? Thank you! Best Relationship, page 7 Hello @StephenMF, I wonder. Could you list your 3ds Max version and the updates version that you use here? To analyze MAXScript errors after running 3ds max, go to the Utility tab - MAXScript - Open Listener. When the Listener window appears, pay attention to the message inside. The message should give users more information about what's in the 3ds max scene file causing the problem. For example, the error MAXScript - Error type: expands: requires MAXClass, received: uncertain. Could you how to get all this message into the post for me please? Thank you! The best relationship I've tried is that, and it still happened, don't know why it only happens on one computer. We also had a problem that instead of installing the 2018 version into the Max 2018 folder, it would install it in the 2016 version, which was strange. View Original X Po: Support When you launch 3ds Max, the following MAXScript error message appears: -- Compilation error: Can't find file: \$startupScripts\vsceneexport.ms -- In-line: include \$startupScripts\vsceneexport.ms Incorrectly installed, or overdue demo of the V-Ray renderer (Made by the Chaos Group). Reinstall V-Ray. If the V-Ray demo used to work earlier but has now expired, go to C:\Program Files-Autodesk-3ds Max (Scenario) Run folder, and do one of the following: Rename the script vrayinstall.ms vrayinstall.ms.BAK. Remove the script from this folder. Delete the script. For more information about V-Ray, contact Chaos Group.
