2021 State Tournament Special Awards Recipients:

DaVinci Award

for having a unique approach, taking risks, and outstanding creativity

- **Saline DI - 122-84733**
- Technical Challenge - Secondary Level
- The Team wrote an environmentally conscious story that used a multitude of film techniques while also integrating video game elements of role play game (RPG) that kept us on the edge of our seats. The story had a defined beginning, middle, and end and could easily have been a feature length film. The entire game was voiced over so we could hear everything and filmed in multiple locations with excellent videography.

Renaissance Award

for outstanding design, engineering, or performance

- **Messmore Elementary School - 122-04729**
 - Engineering Challenge - Elementary Level
 - This team's enthusiasm drew us into their virtual world allowing us all to participate in the adventure. Their captivating artwork and scale model were well thought out, depicting each team members' personality. Their multi-level community center addressed many needs of a thriving society from leisure to shelter and crisis relief. This team's ability to thoroughly integrate function and style left us wanting to move in.
-
- **St. Joseph School - 122-87476**
 - Technical Challenge - Elementary Level
 - The appraisers appreciated the true integration of the tools, not only into the technical element, but also the storyline. Using the silverware collected during the game the team used copper tape and wire, and a battery. When the silverware was placed on top of the trap door, each piece of silverware completed a circuit that created a sound, lights and a motor that unlocked the trap door revealing the ultimate prize. This solution unlocked our hearts and minds and filled us with deLIGHTS.
