FAQ

The program also has an integrated plans database that can be sorted by feature, material, and cost, and displayed by customizable dashboard and tabbed views. August 12, 2017 Bookkeeping, accounting, and payment processing for creative businesses can be a time consuming and often mind-numbing task. Plus, different business owners have different needs — some want to manage their books the same way they do their accounting, some want to use different software, and others require more integration with other software systems. That's why those in the creative fields — the arts, photography, graphic design, and so on — need software that will make their lives easier and help them keep track of their business. Luckily, these creative business owners have many options. We've put together this list of the best accounting software options for creative professionals, so you can make the right choice. 1. Kagi Kagi is an accounting software that's designed with creative professionals in mind. Their software has pre-designed templates that include specialized features for creative businesses, including invoices, project management, bookkeeping, and tax management. Kagi is the only software that has these templates built in, so it's ideal for anyone in the creative industries. With Kagi, you can also keep track of your expenses, receipts, and invoices with ease. Its invoicing system allows you to invoice clients for specific work, or as a project. For example, when invoicing a client for an article, you can select the categories under which you'll invoice them. Kagi also lets you create a quick quote, print invoices, and make bank deposits and payments. 2. QuickBooks Online If you're looking for a straightforward, intuitive way to manage your creative business, then QuickBooks Online is the perfect option. With QuickBooks Online, you can set up one-click payments, make bank deposits, keep track of expenses and invoices, and import transactions from your bank account. Plus, you can manage your business contacts, view invoices, and even track customers on a single dashboard. QuickBooks Online works seamlessly with your bank account and credit cards, which can help you avoid paying extra fees on your account. 3. Xero Xero is another simple and intuitive accounting software designed for creative businesses. Xero has templates specifically designed for arts and photography, so it's
