7" and showed up in the administration panel, no problems there ok, and under the settings menu, is there a way to add a partition? As to install lightdm: this is for installing in ubuntu 17.10? latera: Yes, you can edit the configuration file with gedit, nano or whatever tanter, i'm not sure, if the kernel can boot, just boot an older kernel (shift+ esc) ioria: Ok, I will try that, thanks! latera: in the console it's "sudo gedit /etc/crypttab" ok, and I can just add a partition myself? or do I need to do something? ioria: Should I try booting with the previous kernel, then install the new one? tanter, yes tanter, if you can I am asking because I don't want to do anything that might harm the system latera: it is useful to create an entry in /etc/crypttab for the partition you want to have crypted. Make sure the file is owned by root (and only root) ioria: Uhh, what if I don't have older kernels? latera: by default, crypttab only contains a single entry that is for the device itself. In your case you want to add another

---

entry so the partition is available to crypttab ah, that is the other question I have... how do I add a partition to it? ioria: I'm running 15.10 tanter, ah, ok, i guess you'll be fine ioria: I would like to be on 16.04 though, I think latera: for example, my crypttab contains only the device crypt\_crypt /dev/mapper/crypt\_crypt... then, if I add another device crypt\_crypt2 /dev/mapper/crypt\_crypt2 to crypttab, I can use cryptsetup to use the new device tanter, you can upgrade, but you can 520fdb1ae7
