Spectrometric identification of organic compounds answer key pdf

Presents a sequence of procedures for identifying an unknown organic liquid using mass, NMR, IR and UV spectroscopy, along with specific examples of unknowns and their spectra, Page 2Page 3LEARN ABOUT THESE METRICSArticle Views are counter-compliant sum of full text article downloads since November 2008 (both PDF and HTML) across all institutions and individuals. These metrics are updated regularly to reflect usage up to the last few days. Quotes are the number of other articles citing this article, calculated by Crossref and updated daily. For more information about crossref citation counts, see the results. Altmetric Attention Score is a quantitative measure of the attention that a research paper has received online. Clicking the doughnut icon loads a page on altmetric.com with more details about the score and social media presence for the given article. Find more information about altmetric attention score and how the score is calculated. Page 4LEARN ABOUT THESE METRICSArticle views is the MOT-compliant sum of full-text article downloads since November 2008 (both PDF and HTML) across all institutions and individuals.
