

A GUIDE TO THE INITIAL REQUIRED INFORMATION FROM A PROJECT DEVELOPER FOR DPI® PLATFORM

For a Project

1. Project Executive Summary or Information Memorandum to include cashflows, P&L etc
2. Feasibility Study (if available)
3. Brief capability statement of Management Team
4. A brief background to Manufacturers, including trading history, guarantees/warranties (if any)
5. A brief background to EPC and O&M contractors, list of any T&C's including guarantees/warranties (if any)
6. An indication of the manufactures process feedstock specification requirements as indicated on the manufactures supply contract.
7. Process feedstock supply contract/agreement, including specification to be supplied
8. List of Permits, Consents and Contracts including Power Purchase Agreement.

For Technology being deployed

1. Executive-Summary or Information Memorandum to include cashflows, P&L etc
2. Business Feasibility Study (if available) showing the current status of technology, current throughput
3. Current Operational Hours to date (if Applicable)
4. Background to any events that have prevented continual operational hours (If Applicable)
5. Brief capability statement of Design and Management Team
6. Experience to any third parties connected to the technology, including the manufacture
7. Any third-party reviews, reports
8. An indication of the feedstock specification that the process will treat or currently processing.
9. Confirmation of availability of a full set of design drawings. (P&ID's etc.)
10. Is the technology available for inspection?
11. Are you looking to scale up if so to what throughput?
12. If requiring seed capital (early-stage equity) indicate the use of funds and schedule.

If any additional equipment or an innovate enhancement to your current plant, then please provide the following

1. Details of any innovation to the process and its impact on the current process.
2. Details of any test, ie CFD modelling, carried out and be whom.
3. Can the additional equipment be retrofitted?
