Read more about the Close New book by Templeton Award-winning author. A boiler is where the ingredients are mixed into a transmutation. This is a lab where we're looking for some kind of transcendental, portal that's transporting us to a new reality. In Blue Cauldron, Marcelo Gleiser collects essays on his discussion of the issues he considers most relevant at the moment: our relationships with the planet and its beings, members of society, where we live, and the technology that changes who we are and how we are connected. The theme that connects all texts is a vision of science as our ability to admire the world every time we interact with the mystery of creation. In essence, we find the same impetus that moves the religious spirit: how to deal with our deepest existential problems, our origins, our lives, our death. In this work, Gleiser reminds us that science, along with the mystery of our answers and the mystery around us, can be used as a bridge to a better world and for the imaginary of the worst dystopia. And it invites us to reflect and decide the future we want for ourselves, respecting each other's differences and being open to learning from those who think in other ways. It empties its core, filling it in the hope that others will meet your need to live full life. Life others never works, something that celebrities know very well about. Keep this reflection that acts as the epigraph of this book and enjoy it. December 24, 2019 José Luis appreciated that this was an amazing philosophical book, well written, with many lessons. Collection of writings by the author, Marcelo Gleiser, over time and in various vehicles. In his four parts, he explores the critical and important themes of our lives on earth. Starting with science and spirituality, a difficult and beautiful topic, a little explored youth hasty results. Passing through the relationship between man and planet, the damage caused by warming and climate change, finally ends with a philosophical book, well written, many lessons learned. Collection of writings by the author, Marcelo Gleiser, over time and in various vehicles. In his four parts, he explores the critical and important themes of our lives on earth. Starting with science and spirituality, a difficult and beautiful topic, little to explore for young scientists, their rush to results. Going through the relationship between man and the planet, the damage caused by warming and climate change, to finally end the debate about the future of mankind, especially in the light of abundant technology these days. Thanks for reading, I recommend it. ... More March 02, 2020 Redi Bortoluzzi rated it really liked it written in short chapters, there are several texts that invite you to good thoughts. I found it repetitive at times, but there is a nature of the work that compiles several articles originally published in another media. In this work, you know a bit about the history of ballet, and it certainly helps you instill more beauty in your footsteps. Both the author and translator of the Brazilian ballet publication – my first book has already acted as a dancer at the prestigious Royal Ballet of London. Join them on this journey through the wonderful ballet universe and learn step by step, which is important for the knowledge and technique of classical ballet. Publish work that presents all infertility research tests, from basic (Spermiogram, General Tests, Hormonal, Scrotum Bag Ultrasound) to advanced ones (Hormonal, genetic tests, blood, sperm and immunological profile), as well as their interpretation, through the definition of leading to problems that can cause infertility, demonstration types of reproduction procedures. The title is important in the Urology catalog because the number of infertile people only increases and often the urologist does not know how to target your patient to identify and treat the problem. The authors are nationally known for treating infertility and assisted reproduction.
