Agile Talent Acquisition is part of People Operations, and follows the APF. Agile Talent Acquisition is a subset of a larger methodology known as the APF. * We have adapted this template for use in Marketing. Set up a screen using the parameters below. * Inspired by the Agile Lead Management approach and PeopleOps framework. From Agile Community to PeopleOps Community, we launched the first community of peopleOps practitioners. Keep reading to see the amazing transformation we made. The whole team helped, but we're going to focus on the work of Bryan Alexander and Stacey Alexander. Agile Talent Acquisition is an organizational tool for scaling your PeopleOps maturity. It is most effective when working in tandem with other PeopleOps tools such as a PeopleOps organization culture and processes, or an Agile leadership team. I recommend you use this as a starting point. It is, however, a detailed template. If you would like to focus on a specific Agile Talent Acquisition practice, select the Practice or Chapter of your interest. We do recommend you think about implementing the full Agile PeopleOps framework (APF) as part of your overall PeopleOps maturity. Agile Talent Acquisition is a direct result of the success we have experienced with Agile Talent Acquisition Tools, Agile Boards, and Agile Reporting. We've seen organizations who have gone from a "Agile" attitude to a "PeopleOps" attitude through the use of these tools. You may know of Agile Talent Acquisition tools, such as the Agile Board, that deliver value. Agile Boards and Agile Reporting can help you improve, but it's not the whole picture. PeopleOps is more than tools. You need to understand the underlying principles to enable value. For example, if you need to improve your HR function, but don't understand or fully believe in a PeopleOps mindset, tools are useless. We recommend that you use this as a starting point, and then modify it as you like. There's a lot of common sense in the template. We think this works for an ideal case, as well as a more realistic example. * Is this case you have not yet achieved the maturity level of PeopleOps. Agile Talent Acquisition is an organizational tool for scaling your PeopleOps maturity. In contrast to how we think of "people" and "organizations," the PeopleOps approach doesn't consider "people" and "organizations" to be homogenous. "People" are more complex. People are individuals 520fdb1ae7
