On May 7, 2011 I was looking for this theme as I knew I had put directions here somewhere. I need to reset my pedometer, phewwww. This thread is a March 1, 2012 tutorial. THE SECURITY SYMBOLS USED IN THIS TRAINING GUIDE. Measure.your.stride.length.before.start.to.set.the.pedometer As May 5, 2017 measure from a known distance such as 20 feet or 50 feet. Then get up to speed in your natural walk and count the number of steps it takes to cover that distance. Divide the number of feet by the number of steps. Legs separated by steps and the length of the set in the legs. Step 3. Click the SYSTEM RESET button with a thin stick that is not easy to break and put the battery cover back on the pedometer. SET UP IN REAL TIME. 1.Programming pedometer. Tap the Mode button until the screen cursor hits the DIS (mile) or until the screen shows the number of steps that have already been counted by the pedometer. Click Set until the length of the step is shown on the screen. Click the Reboot button if you need to change the length of the step and then click set. 12 December 2008 Click SET to go to step length setting mode. Click the SET button to increase the length of the step by one inch. (The step length can be set from 10 to 90 inches.) For more detailed instructions/illustrations, please see the instructions of the manufacturers attached with the pedometer. Scooped by atadzfo Scoop.it!
