Daniel Schacter is professor of psychology at Harvard University in the Us. He is the author of *The Search for Memory* and the *Seven Sins of Memory*, both winners of the William James Book Prize by APA. Daniel Gilbert is professor of psychology at Harvard University in the Us. He won numerous awards, including the Phi Beta Kappa Teaching Prize, the Guggenheim Fellowship, and the American Psychological Association Distinguished Scientific Award for early career contribution to psychology. Daniel Wegner was professor of psychology at Harvard University in the Us. The author of *White Bears* and other unwanted thoughts and illusions of conscious humanity, he was also a member of the Board of Review editors for the journal *Science*. Bruce Hood is professor of developmental psychology at the Society at the University of Bristol, UK. Bruce appeared in numerous television science papers and in 2011 gave Christmas lectures to the Royal Institution, which were broadcast on the BBC by more than 4 million viewers. Schacter, Gilbert, Wegner, and Nock *Psychology*, the third edition is widely recognized for captivation students with modern psychology research on the main topics of the introductory course, while helping them develop critical thinking skills that remain with them after the course term. Expert coverage of DSM-5, quirky examples of thinking gone awry, scenarios based on common psychological misconceptions, and contributions from new co-author Matthew Nock highlight the new issue. And now, this groundbreaking text is available in a version created only for Canadian students and teachers. It offers the same fascinating writing, useful study tools, and keen eye for interesting stories like *Psychology*, third edition, but with a wide range of Canadian examples and influential work by Canadian researchers incorporated throughout. Welcome Canadian author, Ingrid JohnsrudeIngrid's main area of investigation is the neural basis of speech understanding, and she conducts experiments examining how speeches are transformed into acoustic signals and then into meaning through various cognitive processes. Her investigations include multiple levels-from understanding brain structures involved in hearing and understanding to observing ways for listeners to deal with problems such as background noise. LaunchPad, featuring LearningCurvePsychology. The Third Canadian Edition has its own dedicated version of the new Online Worth Space course, LaunchPad.
