Assassin's creed unity for android apk

If you are a football fan and love the beautiful goals of the top superstars in the world, then you should read this review because of Score! Hero MOD APK is a game you can't miss. ContentsRonaldo is standing in front of the free kick ... What a void! The crowd explodes! Can you believe it? The publisher of this game is First Touch Games, a UK gaming development studio and sports game publisher. Apart from this game, they have produced a lot of very interesting football games on many different platforms, typical is Score! Match, Dream League Soccer 2020.Special momentsI saw special moments in football, would be Ibrahimovic's bike upside down, Messi technique or Roberto Carlos's long shot from distance. In Score! Hero, you will be mastering those moments of player control to launch the decision to pass or shot, bringing the team to victory. If you think this game is similar to Football Manager or PES, then you are wrong. You don't have to control all 11 players on the field, just control specific players, create beautiful combinations or super goals. As a chessboard is arranged, your task is to shoot the orbit of a balloon (by dragging the phone screen) to move to teammates or kick the ball into the enemy's objective. The ball will fly along the path you are drawing, and as a result, you will see the enemy goalkeeper in the net to pick up the ball. If the ball falls into the opponent's foot or is blocked by the goalkeeper, you will lose. Currently, Score! Hero has over 580 levels for players, each level is a challenge from easy to hard. Your achievements are represented as stars. You have to earn at least one star in order to level up. Of course, the goal of every player who plays this game is to complete all levels with three stars. Although this is a football game, I find it more like a puzzle game because each level is a puzzle for you to solve. Launch an assist or direct score with a nice curve, it all depends on your creativity. Upgrade playerEach player is the pride of their country, in the game are called a hero. Score! Hero allows you to buy accessories for players such as clothing, shoes, socks, hair... and you can sign with any club you want. However, players do not have their own stats, so even Ronaldo or Paul Pogba is like other normal players. You don't see player progress, the only progress is that you are overcoming the increasingly difficult levels of the game. But I don't despise the players, because they rarely miss the assist they create. A header or a volley shot will turn the pass into a nice goal. Don't fail too much! Score! Hero limits the number of plays every day. In the corner right side of the screen, there are five heart icons. After four time failures, you will lose a heart (turns gray), so theory, will max fail at 20 times a day. Each heart needs 15 minutes to heal, but players can use the money to buy more turns. High quality 3D graphicsScore graphics! Hero is very realistic thanks to 3D technology and careful care of the developer. The movement of players is flexible, smooth, towards the most serious experience for players. You can see beautiful stage cutting targets and slow-motion video. Like other football games, an indispensable part is a commentator. Although their sentences are not diversified, they continue to keep up with the situations in the game. The public's cheers and commenter's comments will bring maximum feelings to you when you play the game. MOD APK version of the score! HeroMOD featuresLimited money: You can spend money in the game, I don't care how much money you have. Unlimited EnergyNote Mod version can be stopped on some devices. Download Score!
