I wanted a nice bench that could fit a couple of kids. And I'm pretty sure it's a requirement to have a secret compartment in your secret garden so we add that element to the bench. Not only can you put top secret things, but you can also store lady bugs and bee checker pieces. My husband and I made this bench. We are not woodworking cleaners by any means, but carpentry does have many similarities with sewing. We basically made it as we went and using the material we had around the house over some we bought a new one. I will try my best to describe how we made it for those who might want to restore it. Hopefully this makes sense to you. To make this stand you will need - (7) 4 spacious Cedar fence boards (2) 2x4 (1) 1x3 (1) 2x2 (that, what we were laying around) (1) box 1 1/4 wooden screws (1) box 1 1/2 4d nails (4) corner brackets (2) strap hinges (8) Simpson strong tie strapSpire you will make a frame on the bench. We developed a frame around the storage compartment. Using 2x4 has two back legs at 26 and two front legs are 20. The front legs will be longer, then the seat to form the armrest. The width of the frame piece is 12 , and the length of the pieces is 25.5. Use Simpson strong ties and corner brackets to secure the frame together. For the base of the storage area you will need (7) 12 fence board pieces. and (2) 25.52x2's. Attach 2x2s under the frame, they will be what you screw 12 pieces too. On the top seat you will need (7) fence boards to cut 13, and (2) 1x3's cut at 25.5 Secure all fence boards for 1x3's. Then screw on the hinges and attach it to the chair. On the back of the chair you will need (9) fence boards 15,5 , (2) 25.5 1x3 1x3 You make it back like you made at the bottom. Screw the pieces together like pictured. Before you attach to the back of the chair you nail the armrests. For armrests you will need (2) 14 fence board pieces. Nail at the edge of the hand rests on each end of the panel 3.25 above the bottom. To fasten your back, you will need to allow at least 1 crack above the bottom so that the bench will open properly. Nail the two final pieces and secure back with strong ties. No you nail the edges of the rest of your hands on the 2x4 front legs. Sand and stain to your liking. I haven't decided on stain color and still have some grinding to do, but you get a gist. Hopefully the pictures will help as well. The last change on December 18, 2020 for Weeknights is wild. There are hobby meetings, sporting events, date nights, late night work calls, children's bath time, TV show premiers (of course), and there are also... Dinner? Trying to cram in, making a recipe, eating dinner (not to mention enjoying a meal) and cleaning the kitchen within an hour always seemed to require some sort of divine intervention. Well, let me introduce you to the power pressure cooker, a.a. a.g. game changer. Power pressure cooker makes it impossible. You can create a healthy, balanced meal in less than an hour from start to finish. Even decadent dishes such as braised short ribs or whole meals such as salmon with potatoes and broccoli can be enjoyed from start to finish with a breeze on a weeknight. Is there anything easier than throwing your whole meal into one pot and letting the pot do the job? I can't think of anything.
