

Country Selection

Below is a list of countries with which we have previously exchanged. These are possible destinations for your upcoming exchange year; however, we cannot guarantee that your first choice will be available. A country may already have been assigned to another student or may specify that they will accept only a male or female student based on their hosting situation.

If your preferred country is unavailable or you do not meet its criteria, you will need to provide an alternative destination. In most cases, we can arrange an exchange with one of your top three choices. However, it is important that you also indicate any countries you or your parents would not find acceptable. This helps us avoid assigning a destination that you would ultimately decline.

For long-term exchanges, the numbers in brackets indicate the age restrictions in that country on your date of arrival. The letters **Y**, **N**, or **S** indicate whether the country accepts students who have already graduated. Some countries may make exceptions, which are considered on a case-by-case basis.

Please cross off any countries that would **NOT** be acceptable to you:
