The screen is not full. In the middle of the film, editing stops 2-3 times and starts again - a very bad editing job. Don't send it back, probably another one just like him. Its not a 2-day ship as advertised. The film could have made a better special impact to show some of the critters close to the rest subdued in the background - not so great for digital cinema. There was something to tell you that the story would be about. If you leave you will miss the OMG storyline. could have been filmed better. Helpful? It's movies anywhere - Disney has its hands on everything. But, if you buy you can see it on Vudu, if you are related I believe it is just not ultraviolet. Ultraviolet is where everyone else on your Vudu exchange can also see it. With movies anywhere only you can see it. Useful?1 Answer our prices We strive to ensure low prices every day, at all.
