A history of magic by bathilda bagshot pdf

1st Edition: 1947: Between 1947 and 1991, The 1st Edition: Little Red Books No.1/2 Edition: M. L. Books (M. L. Books) The Magical History to the 20th Century Standard Text for Students at Hogwarts Bathilda Bagshot began a journey of magical knowledge decades ago. She has always been fascinated by the mysteries and rarities of the magical world. The history of magic examines important moments and facts from the beginning of time to the 19th century, which makes this book an integral part of magical literature. - The back cover of History of Magic was a book written by Bathilda Bagshot, one of the most outstanding magical historians to date. It covered the history of the magical world until the end of the 19th century. The contents of the book cover various people and events such as: witch hunt, goblin rebellion, Uric Oddball, Giant Wars, and other events as well. This book cost two galleons in Flourish and Blotts. The contents of the show History Book was first published in 1947 by the Little Red Book. The second edition was released by M. L. Books on an unknown day. It was not one of the textbooks that Harry read most closely. Harry said he opened it once, and since he said he got a name for his anefri d'eger from the book, that may have been the only time he opened the book. The story of magic was one of Hermione's books packed in a handbag when the trio went hunting Voldemort's Horcruxes. When Harry admitted that he did not know that Godric's Hollow was named after Godric Gryffindor, she read him an excerpt from the book. After their trip to Godrick Hollow, Hermione read The Story of Magic at night, while Harry struggled with the loss of a wand and learned of Albus Dumbledore's friendship with Gellert Grindelwald. It was a must-have text for all Hogwarts students from the first year for the magic history lesson taught by Professor Binns. Hermione Granger had an additional copy of this book in the school trunk. The little one could be heard over the squawking Diricawls, the groans of the Augureys and the relentless, shrill song of the Fwoopers. As witches and wizards tried to consult papers in front of them, different fairies and fairies whirled around their heads, giggling and jabbering. About a dozen trolls began smashing the camera with their batons, while witches glided around the place in search of children to eat. The head of the Council got up to open the meeting, slipped on a pile of Porloc manure and ran cursing from the hall. - Bagshot describes a meeting of the Council of Wizards (led by Berdok Muldoon) with representatives of all creatures, while defined as every creature that walked on two legs ---- non-magical people (better known as muggles) were particularly afraid of magic, but not very well recognizing it. On the rare occasions that they caught a real witch master, burning had no effect at all. A witch or wizard will perform a basic Flame Freezing Charm and then pretend to scream in pain, enjoying a gentle, tickling sensation. In fact, Wendelin Weird enjoyed being burned so much that she allowed herself to be caught at least forty-seven times in various disguises. - Bagshot describes witch burning in medieval times by the signature of the International Statute of Secrecy in 1689, the masters went underground forever. Naturally, they may have formed their own small communities within the community. Many small villages and villages have attracted several magical families who have come together for mutual support and protection. The villages of Tinworth in Cornwall, Upper Flagley in Yorkshire, and Ottawa St on the south coast of England were notable home knots of magical families who lived next to tolerant and sometimes confunded muggles. The most famous of these semi-sounding habitats is perhaps Godrich Hollow, the village of the West Country where the great wizard Godric Gryffindor was born, and where Bowman Wright, the Magic Blacksmith, forged the first Golden Snick. The cemetery is full of names of ancient magical families, and it accounts without doubt for stories of hauntings that have dogged little churches beside it for centuries. - On the consequences of the master's solitude after the signing of the Charter of Mystery in 1689 behind the scenes of the Book, as seen in the Harry Potter Book: The Wizards unite in the early British editions of Harry Potter and the Prisoner of Azkaban, the book incorrectly said that was written by Adalbert Waffling, not Bathilda Bagshot. The error was corrected in American publications and then in British publications. Although required and used in his class, Harry Potter says he never read it, maybe just opened it up, showing his obvious dislike for the subject. However Hedwig is the name that Harry found in the book (perhaps he found it when he read the book for the first time).
