We strive to do everything to provide you with comfortable access to 3G/ 4G Internet. This instruction will allow you to set up the modem that you have purchased from us. The Huawei K4511 3G USB modem was taken as an example. This model has a high data rate. It has a slot for SIM cards and memory cards. An added benefit is having an outlet to connect the external GSM antenna. Other Huawei modems that are presented on our service are also set up. If you have any questions, contact our technical support team at 0-800-210-295. We will help you get high-speed Internet as quickly as possible. The 3g, 4g CDMA USB modem to Vodafone Wireless Internet, Kievstar, Lifecell on a computer with Windows 7, 8, 10 installed operating system. First, you need to install the driver to the modem. The easiest way is when the installation file automatically starts, which is in the modem memory when the modem first connects to the computer, or from the installation disk, which comes complete with the modem. When you're properly installed, you should see the name of your modem in the device manager: start button - If there's nothing in modema except the standard modem, repeat installing the modem driver or make sure it's healthy. Now you need to create an Internet connection. To do this in the Panel -Gt; Center for Network Management and Shared Access Will Choose Setting up a new connection or network: Choose the option of connecting to the Internet and click Next: Put a bird No, create a new connection Next will choose a Switch connection using a modem or ISDN: In the next window you need to enter all the necessary data to connect to the Internet from Vodafone, Kiev, Lifecell. The username and password are left blank: As a result, the name of our Internet connection - the Internet should appear in the Control Panel - the Center for Network Management and Shared Access in the Connect to the Network section Nazhem Connection and see a window to connect to the Internet. For the first time, it's a good place to set up our newly created connection. To do this, click Properties: Make sure that the Connect line is worth the name of your modem. If there are several modems, you need to put a bird in front of your modem: Click Set up to choose the maximum speed and put the bird in front of the Hardware Flow Control. Click OK: Now you can try to run the first Internet connection by clicking on The Challenge: If done correctly you should see the following windows: And as a result... Cheers! Connection to high-speed wireless Internet from Vodafone, Kievstar, Lifecell in the environment of the operating system Windows 7, 8, 10 took place. Congratulations! Find out more from a specialist consultant Leave your phone, our expert will call you back within 5 minutes and answer all questions! You don't need to be an expert to understand Vodafone modem modes. Creators have tried to make it as simple and easy to use as possible. In a pinch, you can read the manual, which is always attached to the purchased device, or contact the staff of the Vodafone Ukraine contact center. Vodafone Modem Modem Modem Modem Modem Vodafone Ukraine depends on the type of device chosen by the subscriber: users can connect it to the computer via USB and connect to the network directly; or use the device to distribute wi-fi.The speed of connection depends on the tariff and network: when connected to 4G the quality will be higher than at 3G connection.The owners of the device are able to choose the network themselves or leave the settings unchanged (then the connection is different.Then the connection to the 4G connection will be higher than at the 3G connection. that quality depends on network coverage: not all cities and districts of Ukraine operator can maintain a high-speed connection.How to connect the device 3G and 4G Connectivity also depends on the type of device purchased. Owners of wireless wi-fi routers are enough: turn on the wi-fi on the PC; see the list of wireless networks and find the right one; enter the password (usually indicated on the box or device case). If it doesn't make it automatic; you'll have to check if you've accessed the Internet. It is installed automatically when the device first connects to your laptop.Additional settings are also not necessary, but users can: choose the network themselves; change the password from wi-fi and set the name of the network; check the list of devices connected to the wireless connection; monitor the balance of the SIM card and the number of gigabytes remaining in the package; set a monthly traffic limit, That is, users are able to independently manage internet access by regulating the order of connection and the process of using traffic.4G modemUse 4G modems is almost entirely consistent with what is already stated above, so knowing how to set up 3G modem MTS Ukraine on a laptop, users can easily cope with the preparation for the work of other devices of the company. To learn all the features of the equipment, it is enough to view the settings tab in the device menu. To enable the search for updates, it is enough to find the appropriate menu item and start the process.But it is important to remember that at the time of downloading the software you need to keep in touch and not disconnect the gadget from the computer. Otherwise, there may be a breakdown.Tariffs Vodafone for modemOperator Just 2 tariffs for the modem. The first is for prepaid subscribers, Second - for customers on the contract.ServiceDevice LDevice 4GPup of the Internet30 GB30 GBTotost 1 additional GB after exhaustion of the package5 UAH.15 UAH.Calls to Ukraine1 UAH1.1.5 UAH.Reports1 UAH1.5 UAH1.5 UAH1.5 UAH Year without subscriptions service is available to subscribers, which reduces the cost of communication. So subscribers will have to choose from the above options.Where to buyBuy Vodafone modems can:The price depends on the customer's chosen router model. Users can buy an inexpensive device, but the decisive when buying should be not the cost, and the characteristics of the equipment. When buying the device online, you can write a chat room and ask consultants interesting questions. Questions.
