My daughter used this book and my son is an albany book by Ron Larson in their high school AP Calculus class. I think this book gets into the highlights in a simpler and less rgaphical approach. Larson's book is more comprehensive with a way of more endorsements and theories that leads to loss of attention and lost in the maze for some students for the first time. In short, this book is better for students intending major in engineering and Ron Larson books for people intending basics in mathematics and theoretical physics from algebrauka observation. While I can't say I love calculus, this book was necessary and it served its purpose well. One person found it useful. eBay's Graphic Numerical Numerical is Good Price and Good Value. Very happy with this purchase. Bought it as a spare so my son could have a book at home and one at school. Makes his backpack easier. Arrived in great shape. This meets my expectations, and the book is really useful. See all 75 reviews. When asked by Wiki What's the time to sign the Song Atin Cu Pung Singsing? Asked Wiki user Ano ang katangian ng salawikain? Responding to a question from Wiki user Ross L. Finney, The Late Franklin Deman, Ohio State University's Bert K. Waits Daniel Kennedy ©2012 (en) Addison-Wesley Format Online Supplement ISBN-13: 9780132801621 Availability Advanced Accommodation calculation BCI retired at the end of the 2015-2016 school year. Please note that any information on this page was current for 2015-2016, but may become dated. Please contact your current calculus teacher if you are in doubt. The extended calculus of B.C. placement covers the equivalent of three-quarters of the college's calculus. The extended calculation of AB placement covers the equivalent of two-quarters of the college's calculus. The majority of students will choose to take an extended placement calculator test in May, and many will receive college credit. For more information from CollegeBoard.com m. Schedule Calculator: Students will use chart calculators in class and when taking the Advanced Placement Test. It is highly recommended that each student buy their own calculator, if at all possible. At the time of my retirement, the recommended calculator was Texas Instruments TI-Nspire cx CAS. This calculator has amazing features and should last you through college. For more information click here. NOTE: Please contact your calculus teacher for the necessary calculator for your class. Note: If you already have a Texas Instruments TI-89 graph calculator, you can use TI-89 for calculus and you won't be at a disadvantage. To sum up, your calculator selection: 1. Texas Instruments TI-Nspire cx CAS Note: There are several versions of TI-Nspire. Make sure the one you buy has the letters cx (which denotes color and CAS (which denotes the computer system of algebra). Don't buy any of the other versions. 2. Texas Instruments TI-89 Chart Calculator - You can use either the current titanium edition or the old black TI-89. Students who are also enrolled in A.P. statistics next year will also be able to use either TI-Nspire cx CAS or TI-89 in Statistics, and no need to buy two calculators. TI-Nspire cx CAS is often unavailable locally and usually must be ordered from Amazon or other online source. Once again, don't buy any other version of TI-Nspire, no matter what the seller tells you or what it says on the packaging. The tutorial I used was: Calculus: Graphic, Numerical, Algebraic Finney, Demana, Waits and Kennedy, 3rd edition, © 2007. This tutorial is the successor to the books that we have been using for many years. This version is written specifically for extended placement calculus classes, and includes many improvements, including an example of advanced placement style issues. Homework: - Lists of job calculus that I have used during the last two years of study can be found here. I have included them on this site for the benefit of other calculus teachers who can use the same tutorial. Formula Calculus: This is an extensive list of formulas that my classes use in AB Calculus, B.C. Calculus and Calculus III. Note: The first 8 pages for AB Calculus, the first 11 pages for BC Calculus. You might not want to print all 19 pages. Note: Current Calculus teachers at Hanford High School have their own formula lists. (The list is stored on Google Drive. Note to other calculus teachers: The above list is in PDF format. If you want to be able to edit the list for your own use, you can download it in Word 97-2003 by clicking HERE. MathType may need to read the formulas if you open a list in Word.On-line Solutions: The Slader website provides detailed solutions to most of the problems in our tutorial, which is the calculus of the graphic numerical algebraic third edition. Note: This is a third-party site and I can't vouch for the accuracy of the solutions. This ad is supported and you will need to subscribe to a free account to see the full workable solutions. Colleges attended by Hanford Calculus students: Ever since I started teaching calculus at Hanford in 1993, I've been tracking where students went to college. Here's a list of these schools.
