

## WHY CHANGE THE PROCESS?

We pride ourselves in being fast, fair and founder-centric at Miami Angels. Venture capital has changed since we were founded in 2013, and it's time for our investment process to change, too.

Our new investment process is designed to be quick and efficient, and will pair founders with members who have expertise in their field from the start.

### Step 1 | Initial Screen:

The prospective company meets with Miami Angels staff, who determine a recommendation for deal review based on our investment framework.

### Step 2 | Evaluation:

We connect 2-4 members with the company to review its business model and provide advice.

### Step 3 | Deal Review:

If a member is interested in investing, the company will then present to the small member group via Zoom. After deal review is complete, if the member group decides they would like to invest, the member will act as an advocate, championing the company and presenting their investment rationale to the membership.

### Step 4 | Deal Call & Investment:

A deal call is hosted where the entire membership hears from the founder. Investment commitments are taken from members a few days after and the founder is notified of the final amount.
