Snap-on torque wrench calibration

How often do you need to calibrate your Snap On torque key? Snap On recommends a re-calibration interval between 5000-7000 cycles. A cycle is a single click on a click key, or generally a measurable torque on any other type. This adds up very quickly! Snap On makes an excellent torque key! But a good torque key is really just as good as its calibration. Contact us today to keep your key in working order! ISO17025 Accredited - ASTM E4 Calibration - ASME B107 Calibration all brands and models calibrated 24 hours turn-around capacity from 1 oz/in to 2000 lb/ft Minimize exposure to noncompliant work today! Now it's done... Snap On Torque Wnech Calibration Sturtevant Richmond Torque Wnech Calibration Tohnichi Torque W calibration CDI Torque Wrench Calibration Norbar Torque Wnech Calibration Torque Wrenalcraft Craftsman Torque Wrenzal calibration Proto Torque Wrench Calibration Did you know that C.S.C. Force Measurement performs force calibration and torque calibration on all equipment types? If twists, push, or shoot, C.S.C. Force Measurement can calibrate! I was in the market for a moment on the couple key.. I like the ones with the adjustment on the side. If I buy a used one, I'd like to calibrate it. Is this a Snap On service deals? I once heard a dealer could do this, but I could also see him shying away from doing free work for someone who didn't buy from him. Most SO tool trucks have a device to check the calibration. However, they will not perform a calibration adjustment. Tell him your concern about free labor, and give him \$10 for the favor. The key you're talking about made by precision tools and is available much cheaper with this brand name stamped on it, but without a Snappy ratchet head. 12-17-2011, 3:13 #3 Senior Member Join Date: April 2008 Location: New Mexico Posts: 7,461 Re: Snap Snap calibration of the torque key. I believe Snapon will perform the service, but they will deliver it to one of their service centers; you might also try these guys: www.teamtorque.com _____ I can't stop buying the \$1 Snap-On 1/2 keys! Don't worry its OK, not alone, tool addicts in the u.S.A.! Being able to get into your rollaway and finding the right tool for any given situation/repair, is the ultimate power journey! 12-17-2011, 3:22 #4 Senior Member Join Date: Aug 2011 Posts: 481 Re: Snap on torque calibration key. Sponsored Links (Register now to hide all ads) Couple team made three of my high prices, turn fast around and no complaint 12-17-2011, 06:26 #5 Senior Member Join Date: November 2009 Location: Montana Posts: 5,711 Re: Snap on Key Calibration. You should find a dealer with Checker. I bought my first couple keys in 1998 and both checked dead on with my Checker dealers. Their couple keys are pretty good. That said, I treat mine like a bottle and they use and return to my unloaded box to protect them. 12-17-2011, 06:49 #6 Senior Member Join Date: May 2011 Location: Cottage Grove, WI Posts: 526 Re: Snap on Torque Calibration Key. Quote: Originally Posted by THE WR250F Couple Team made three of my high prices turn fast around and no complaint How much did you charge each? I see their shape says calabration doesn't include adjustment, so I'm just curious to see the actual cost on the door. 12-17-2011, 06:53 #7 Senior Member Join Date: Sep 2010 Posts: 1,464 Re: Snap on torque key calibration. My dealer will check the key, but you have to send it in case it needs the horsebrated. _____ No one has come anywhere in the world by simply being satisfied. Couple Key Calibration 05-17-2015, 05:52 #9 Member Join Date: April 2013 Location: ST. Peters MO Posts: 82 Re: Snap on Torque Key Calibration. I have 3 snap on the torque keys clicker type that I need to have checked and possibly re calibrated. I called snap on through the number on their webside finally got the correct phone number for the department I needed. However, after being transferred a bunch of times it was already closing time. The fee to recalibrate is only short of about \$70 per hat as the guy I spoke to said. I'm waiting on a snapon truck to call me to check before sending in _____ The shores of history are filled with wrecks of civilizations, where once free people trust their rights and freedom to an entirely centralized government « Previous « Previous | Next Thread » Posting Rules You Can't post new threads You can't post replies You can't post attachments You can't edit messages the HTML code is on sponsored links (Register now to hide all ads) All hours are GMT -5. Now it's 1:50. I successfully calibrated a few torque keys using a digital torque key adapter I set up. I would now like to calibrate the old dad snap on the QJR3200C, but there is an adjustment screw at the end like all the other keys I've seen. Do I adjust it? Here are some key pictures I got through Google. That's missing the lever of change, but mine is in good condition.edit: Finally I have to take my own pic. There's a screw on the lock ring thing. It is the only screw on the tree or handle. 2 11 comments Key, Torque, Calibration, Display, Index, Current, Fixture, Applied, Wheels, Techingle, Procedures, Buy1.snapon.com Calibration Procedures for Techangle - Snap-on Snap-on
