

Jira Core is built for business teams.

Manage defined processes and projects

Marketing:

Manage campaigns, product launches and review cycles of any type of collateral such as blogs and ad creatives.

HR:

Track the candidate recruitment process and organize tasks to onboard new hires.

Finance:

Stay within budget and properly review all purchases and procurement.

Legal:

Review documents such as NDAs, Terms of Use and Privacy Policies before they get signed and approved.

Monitor details

Task management is easier with statuses, comments, and attachments in one place. Plus with notifications, specific team members will know when their attention is needed.

Measure performance

Follow the status of team projects in different ways: with a quick overview, customized dashboards, or even a pre-defined report.

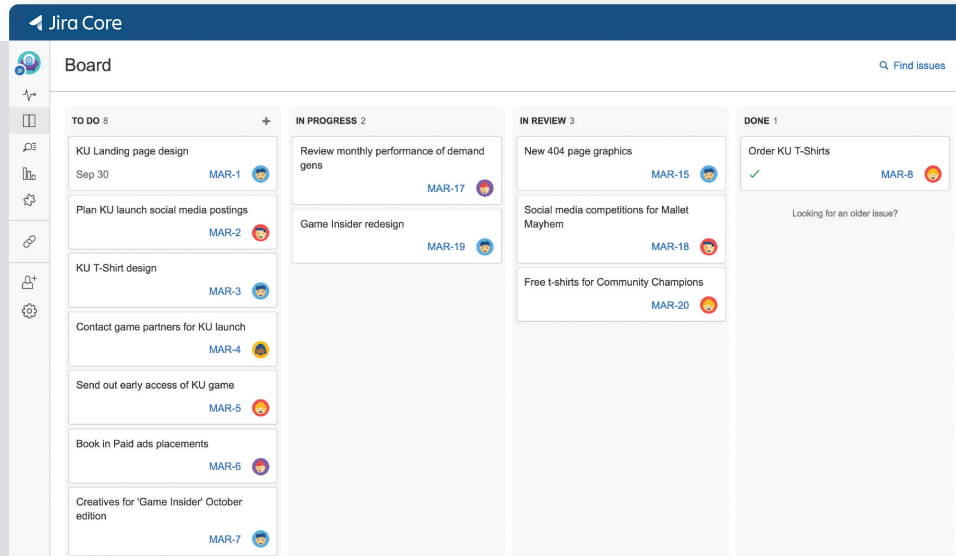

Jira Core is a project and task management solution for business teams.

LUFTHANSA SYSTEMS INDEED AERIA GAMES YP DRAWBRIDGE

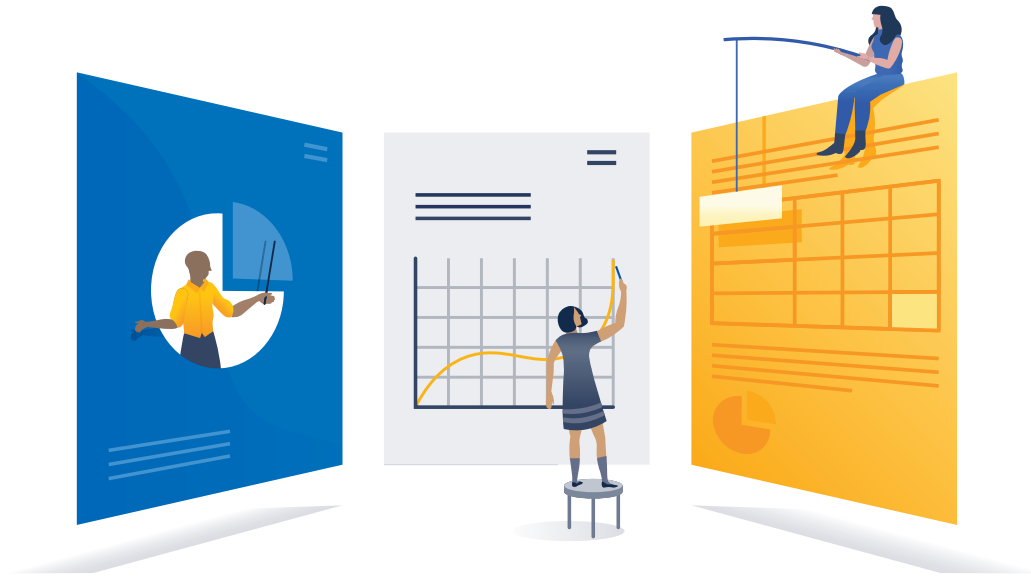

Just like Jira Software, Jira Core cloud instances have boards that give teams an immediate snapshot of their project. Boards match the steps of a team's workflow and adapt to how each team works.

To get even more out of Jira Core, connect it with over 1200+ add-ons and integrations available in our Marketplace such as Salesforce or Google Drive.
