

INNOVALINQ

Licensing made easy.

InnovaLinq makes regulatory compliance easier and less expensive for the gaming industry by automating repetitive license application, renewal and reporting processes.

Our software connects individuals, companies and gaming regulators on a highly secure, web-based platform. InnovaLinq automates license applications and renewals processes with workflow and a central task manager that provides notification of upcoming events.

InnovaLinq Benefits

Individuals

Security: Know your data is protected, and know when and by whom it was accessed.

Knowledge: Know the status of your applications and renewals. Quickly find your license information.

Portability: Carry your “digital dossier” with you as your change employers.

Operators and Manufacturers

Reduce costs: Improve efficiency for applicants and regulatory compliance staff.

Less administration: Automation reduces manual effort, human error and incomplete applications.

Better compliance: Reduce or eliminate problems related to non-compliance.

Regulators

Improved efficiency: Focus your efforts on investigations and enforcement.

Less administration: Automation improves license application completeness and accuracy.

Shared platform: Benefits all parties involved in regulatory compliance.

InnovaLinq Features

Shared Platform, Designed for the Future

Common platform connects individuals, operators/manufacturers and regulators to automate the license application and renewal processes.

System supports hardcopy applications and electronic submissions (subject to jurisdictional requirements).

Can be interfaced with other systems such as HR, financial, etc.

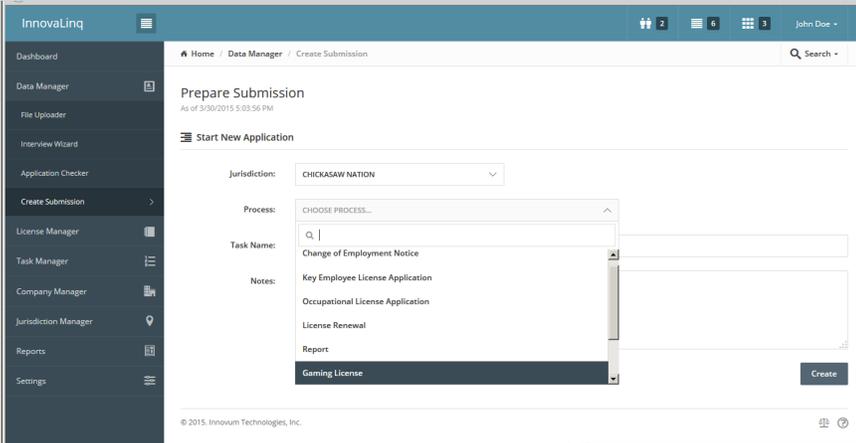

Scalable, Dependable and Cost-Effective

Flexible design enables the system to support gaming jurisdictions around the world.

Cloud-based architecture means the system is always available, and will scale to meet growing requirements without requiring IT infrastructure.

Cost-effective service pricing models designed to meet the needs of small, mid-size and large organizations.

Prepare, validate and submit license applications, renewals and reports

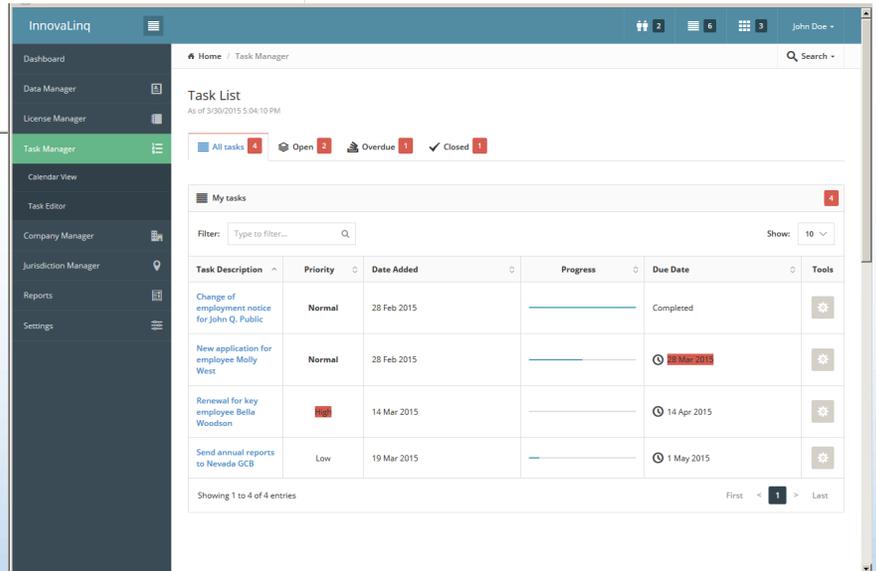

Workflow Automation

System is designed specifically for the gaming industry, using technology proven in highly regulated industries.

Workflows support the needs of qualifiers (individuals), licensees (operators and manufacturers) and regulators.

Workflows can be customized to meet the needs of applicants and/or regulators.

Central Task Manager keeps you on schedule

Data Protection and Security

Qualifier retains ownership of personal information

SSL with 256-bit AES encryption

Username and password required for system access

Application-level authentication on each transaction

Files and data encrypted on server

Active intrusion detection and prevention systems detect and prevent unauthorized access

SOC-2 certified data center

Services

Software-as-a-Service (SaaS). Your staff has unlimited use of InnovaLinq. Annual subscription fee based on number of jurisdictions subscribed to, licenses managed, and users. Help desk, technical support, and software maintenance releases included in subscription.

License Application Service. Outsource your gaming license application, renewal and reporting needs to our staff. Includes qualifier access to InnovaLinq.
