Napoleon Hill (October 26, 1883-November 8, 1970) was an American author of Self-Help and Finance. He became world famous for his bestselling book Think and Become Rich (1937), a book that is among the 10 best-selling self-help books of all time. Hill's work insisted that high expectations and positive thinking were essential to improving people's quality of life and financial situation. Most of his books have been touted on the market as simple but effective explanatory principles for success. Hill, in our time, is a controversial figure. He was charged with fraud and kidnapping. Modern historians also question many of his statements, such as that he met with billionaire Andrew Carnegie and was a lawyer. A well-known technology site, Gizmodo, called it the most famous scammer you've probably ever heard of. Life and CareerInfanciaNapoleon Hill was born in a cabin near the Appalachian town of Pound in southwest Virginia. His parents were James Monroe Hill and Sarah Sylvania (he had Blair), and he was the grandson of James Madison Hill and Elizabeth (Jones). His grandfather was an English immigrant who came to the United States in 1847 and settled in southwest Virginia.La Hill's mother died when he was nine years old, and his father married a woman named Martha two years later. Martha, his stepmother, had a good influence on him: Stepmother Hill, the widow of the school principal, the civilized wild baby Napoleon, forcing him to go to school and attend church. At the age of 13, Hill began writing as a junior reporter, initially for his father's newspaper. At the age of 15, he married a local girl who accused him of paternity of his son; the girl dropped the claim, and the marriage was annulled. In the early years of Napoleon Hill's career at the age of 17, Hill graduated from high school and went to Tazwell, Virginia, to attend business school. In 1901, Hill agreed to work with attorney Rufus A. Ayers, a coal magnate and former Virginia attorney general. Author Richard Lingeman said Hill got the job after taking steps to preserve the privacy of the death of a black hotel assistant whose former mine manager accidentally shot while drunk. Hill left his coal mine management job shortly thereafter and started law school before retiring due to financial problems. Later in life, Hill will use the name Lawyer Act, although Hill's official biography states that there are no records he lent legitimate for all. Failed trading companies and fraud allegationsHill moved to Mobile, Alabama in 1907 and co-founded the Acree-Hill Lumber Company. In October 1908, The Pensacola Journal reported that the company had been sued for bankruptcy and charges of mail fraud. The Pensacola Journal reported that Hill's timber company purchased timber outside Of Mobile, including in other counties in Alabama and even Florida, before selling wood at a much lower price, and that no refunds have been made so far. In May 1909, Hill moved to Washington, D.C., and founded the Washington Automobile College, where he commissioned students to build, drive, and sell cars. The university assembled cars for Carter Motor Corporation, which filed for bankruptcy in early 1912. In April 1912, Motor World magazine accused Hill University of fraud using misleading marketing materials that would be a joke to anyone with average intelligence. Hill Automotive University closed its doors later this year. In June 1910, while driving his car university, Hill married his first wife, Florence Elizabeth Horner. The couple had their first child, James, in 1911, a second son named Napoleon Blair in 1912 and a third child, David, in 1918. After he closed the automobile college, Hill moved to Lumberport, West Virginia, with his wife's family. He later moved to Chicago and took a job at LaSalle Extension University before co-starting a candy venture that was dubbed the Betsy Ross Candy Shop.During September 1915, Hill established and served as dean of a new school in Chicago, the George Washington Advertising Institute, where he intended to teach the principles of success and self-confidence. On June 4, 1918, the Chicago Tribune reported that the state of Illinois issued two arrest warrants for Hill, who was charged with violating Blue Sky laws, against securities fraud, for attempting to fraudulently sell shares of his school with a capitalization of $100,000, despite the fact that the school's assets were valued at only $1,200. The school eventually closed soon after. Later in his life, Hill said he spent that time advising President Woodrow Wilson at the height of World War I. It is also not known whether this claim is true, but it is cited in a speech collection by Don Hill, compiled by Don Green. He founded several magazines including Hill Golden Rule and Napoleon Hill magazine. In 1922, Hill also founded the Intra-Wall Correspondence School, a charitable foundation dedicated to providing educational materials for inmates in Ohio. The fund was launched, in part, by a cheque forger and former convict Butler Storke, who was sent back to prison just a year later. According to Hill's official biography, this period was also when hundreds of documents linking Hill to several well-known figures were destroyed in a fire in Chicago.La Year of the Success ActIn 1928, Hill moved to Philadelphia and persuaded a Connecticut publisher to publish his eight-volume work, The Law of Success. The book was Hill's first major success, allowing Hill to adopt a lavish lifestyle. By 1929, he had already bought a Rolls-Royce and six hundred acres of property in Catskill Mountain, with the help of some lenders. However, the onset of the Great Depression, also called the '29 crisis, adversely affected Hill's finances, forcing him to part with his Catskills property in foreclosure until the end of 1929. Hill's next published work, The Magic Staircase to Success, turned out to be a commercial failure (What a paradox!). Over the next few years, Hill traveled the United States, reversing his habits of the previous decade, starting several short-term commercial companies. In 1935, Hill's wife Florence filed for divorce in Florida, documented in Emmert's book, J.M., The Story of Napoleon Hill.Think and Become RichFirst Edition To Think and Become Rich, Napoleon Hill's bestseller of 1937, Hill published what would become his bestseller Think and Become Rich. Hill's new wife, Rosa Lee Biland, contributed to this report and edited by Think and Become Rich. Hill's biographers later said that the book had sold 20 million copies over 50 years, though, as Richard Lingman commented in his brief biography, Alice Payne Hackett, 70 Years of Bestsellers, the number of sales was significantly lower. Returning to wealth again, Hill resumed his lavish lifestyle and bought a new estate in Mount Dora, Florida. The couple divorced around 1940, and much of the proceeds from the book's sales went to his ex-wife Rosa Lee Hill, leaving Napoleon Hill with the task of launching his quest for success once again. Hill later met Annie Lou Norman, 47. They married in 1943 and moved to California. Hill then went back to trading to lecture again. Hill's philosophy of achieving achievement has been proposed as a formula for success This book was originally published in 1928 in a multivolume part of the study The Law of Success, so rewrote the manuscript of 1925. Hill defined freedom, democracy, capitalism and harmony among the foundations of his philosophy of achievement. He stated that without these foundations great personal achievements would not have been possible. It can therefore be said that Napoleon Hill is a liberal thinker, at least in the broadest sense of the word, understanding for this the protection of Western values inherited from enlightened thought. One of the secrets of achievement was discussed in Think and Become Rich, but Hill insisted that readers would benefit more if they felt for themselves. Although he didn't explicitly identify this secret in the book, he offered ideas about it in a 20-page book: If you really want money so badly that your desire is an obsession, you won't have a hard time convincing yourself that you'll acquire it. The goal is to want money, and be so determined to have it that you convince yourself that you will have it... You may also know right here that you can never have wealth in large quantities unless you fake yourself that strong desire for money, and the belief that you actually own it. In the introduction, Hill claims the so-called secret that Andrew Carnegie told me implicitly and carelessly and that this secret also inspired Manuel L. Keson of the Philippines to get freedom for his people and then bring him in as his first president. While Hill repeatedly mentions the burning desire for money throughout the book, he also suggests that it's not exactly his secret at all. On the contrary, at the end of his first book, The Law of Success, nine years ago, his secret is defined as the Golden Rule: only harmonious work in cooperation with other people or groups of people, and thus creating value and benefit for them will create a sustainable achievement for themselves. He presented the concept of a certain core goal as a challenge for his readers to ask: What do I really believe? According to Hill, 98% of people had little or no firm faith, making success unlikely. Hill used the story of his son, Blair, who said he was an inspiration to him because although Blair was born without ears, and although his doctor told Hill that his son could not hear or speak, Blair grew up able to hear and speaks almost normally. Hill reports that his son, during his senior year in college, read the chapter of the second manuscript Think and Become Rich, and that he discovered Hill's secret for himself and then inspired hundreds and thousands of people who couldn't Are you joking. From 1952 to 1962, Hill taught his philosophy of personal achievement at conferences on the science of success in partnership with W. Clement Stone.In 1960, Hill and Stone co-authored Success through Positive Mental Attitudes. Norman Vincent Peel says: These two people (Hill and Stone) have a rare gift to inspire and help people... In fact, I have both a personal debt of gratitude for the helpful help I received from his work Philosophy achievement included in the list of books that Should Read in the 2008 John C. Maxwell view. Hill's argument gave a personal perspective (quite bold and perhaps narcissistic) on topics such as racism, slavery, oppression, failure, revolution, war and poverty, and he said that overcoming these difficulties using his Philosophy of Achievement is the responsibility of all people. Influenced by Andrew Carnegie later in life, Hill argued that the turning point in his life was a 1908 appointment as a journalist to interview industrialist, philanthropist and billionaire Andrew Carnegie (died 1919). In 1908, Carnegie was one of the most influential and wealthy people in the world. Hill wrote after Carnegie's death that Carnegie met him at the time and told him to interview rich people to discover a simple formula for success, and that he then simply devoted himself to interviewing many of the successful (read rich) people of the time. Confessions in his 1928 multivolume work, The Law of Success, listed 45 of those he studied, most of these people met them intimately, in person, like those to whom the book was dedicated, Andrew Carnegie, Henry Ford, and Edwin K. Barnes (a collaborator of Thomas Edison). Hill reported that Carnegie gave him a cover letter from Ford, which, according to Hill, gave Alexander Graham Bell, Elmer R. Gates, Thomas Edison and Luther Burbank.Thomas Edison photographed with Napoleon Hill after Hill presented Edison with an award that Edison returned to him (1923) According to the editors of the Success Act, Ralston University Press William H. Taft, HK Cyrus , EM Statler, Edward W. Bock and John presented their positive reviews on the law of success. The list of appreciation books includes, among those Hill wrote, that he personally interviewed Rufus Ayers, John Burrows, Harvey Samuel Firestone, Elbert H. Gary, James J. Hill, George Safford Parker, Theodore Roosevelt, Charles M. Schwab, Frank A. Vanderlip, John Wanamaker, FW Woolworth, Daniel Thew Wright and William Chapter 12 of his book Get Rich: With the World of Mind (1967). He described the spirits as invisible friends, invisible observers, strangers and great school teachers who watched him and who supported the school of wisdom. Hill claims that the Master spoke to him audibly, revealing the secret knowledge. Hill also insists that the Masters can get angry and instantly travel anywhere where they want to gain the necessary knowledge or give knowledge directly, in a voice, to anyone else. Get rich! With the world of reason, a 1960s book supposedly was influenced by Hill's spiritual voices; Hill quotes the Master and says: Much of what he said has already been presented to them in the chapters of this book or will continue in other chapters. Napoleon Hill died at the age of 87 on November 8, 1970. His death was reported by the American newspaper The Bee, danville, Virginia. Hill's obituary reads: The author of the self-taught book Think and Become Rich died on Sunday at the age of 87. Publishers say his self-help book has sold more than 20 million copies. He ran the Napoleon Hill Foundation, which worked to rehabilitate former convicts. Controversy In addition to the fraud charge, the authenticity of many of Hill's statements has been widely questioned. Napoleon Hill's collaboration with Andrew Carnegie was never confirmed by Carnegie or his heirs, and Hill allegedly only began to claim to have interviewed Carnegie after his death. Aside from Hill's writings, there are no reports that the meeting took place. According to Andrew Carnegie's biographer David Nasau, he said of the alleged Carnegie Hill meeting that he found no evidence that Carnegie and Hill were dating and I found no evidence that the book was genuine. Nasau's statement is collected in Matt Novak's book Never Told the Story of Napoleon Hill, The Greatest Scamman of All Time. Outside of Hill's own writings, and apart from the brief meeting of Thomas Edison in 1923, the lack of evidence of many of Hill's other claims to meet other successful men. According to the official biography of Napoleon Hill, the reason for this is that his photographs, letters from presidents and letters of backup from famous people were lost in the fire. In addition to these accusations and fraud charges, Napoleon Hill's other statements were questioned. Napoleon Hill claimed to have helped President Wilson negotiate The Surrender of Germany in World War I, but there is no known evidence that this happened. He said he helped the president Delano Roosevelt wrote his firechats, scripts for a radio show, offering no evidence either. He claimed to be a lawyer, although his official biography stated that there was no record of him providing legal services to anyone. Nor is there any known record that Hill interviewed other famous people whom he claimed to have interviews such as Charles M. Schwab, Theodore Roosevelt, John D. Rockefeller, Edwin K. Barnes and Alexander Graham Bell.Legacy Napoleon HillThe Success magazine nevertheless lends credit to Hill's claims without even mentioning all the shadows of doubt about Hill's legacy and notes that inspired by the proposal of industrialist Andrew Carnegie Napoleon Hill spent 20 years interviewing the most successful people of his time. He distilled his wisdom into the classic 1937 bestseller, Think and Become Rich. Entrepreneur and author Greg S. Reed followed Hill's lead by applying some of his lessons in the book Think and Get Rich STICKABILITY: The Power of Perseverance. Referring to the examples set by today's winners, Reed offers these and other tips: ✍ get along with others. Success is not finite. Someone else's success does not jeopardize your potential, so it shows interest in the achievements of others. These same people will be more willing to help you ✍ you don't give up. Focus on the outcome, not the fight. You will collect rewards when you have the courage and ability to hold on to your vision ✍ stop putting things down. Don't let the doubts stop you. The greatest achievements are those who use it when they are presented. Have the confidence to take on a task that may seem overwhelming ✍ stay true. Let your passion and commitment become stronger than your fears. Understand that it is your job as a great leader to stand out and take the lead, which sometimes means breaking ✍.✍ be a great leader. Leadership is not reserved for a few special ones. Leadership is learned and involves facing challenges with self-control and balance. Only then will you clearly see the solutions you need to achieve your goals. Books of Napoleon Hill Law of Success (1928)The Magic Ladder to Success (1930)Think and Get Rich (1937)Mocking the Devil (1938)How to Sell Your Way to Life (1939)Master Key to Wealth (1945)How to Increase Your Own Salary (1953)Success Through Positive Mental Attitude (with W. Clement Stone) (1959)Get rich !: With the World of Reason (1967)Triumph and Get Rich Through Persuasion (1970)You Can Do Your Own Miracles (1971). Phrases Despite his controversial life story. Napoleon Hill remains the benchmark for financial success, and his teachings are very often cited professionals in financial growth and self-help. While his philosophy and thinking may be controversial, I think it is important to leave some of his suggestions to evaluate his thinking and make judgment (whether negative or positive) of the teachings of this millionaire author who still awakens hatred and loves around the world. About having a definite goal If you want the mind to capture the idea and form a habit for the mind to automatically act on this idea, you have to tell the mind what you want, over and over and over again. About the development of a personal domain Whatever you lack in education, knowledge or influence, you can always get it through someone who has it. Sharing favors and sharing knowledge is one of the greatest exchanges in the world. The application of faithCons awareness knows only what you say, or what you allow others to talk about, or what you allow the circumstance of life to say... Take what you send, and if you basically send thoughts about poverty and ill health and failure, that's exactly what you get. About going further I don't know of any quality or traits that can give a person a faster chance than getting out of their way or doing someone a favor or doing something useful. About being a good person don't take something too seriously, no matter what it is. During the Depression (29 and 1930s) four of my friends committed suicide. Two of them jumped out of high-rise buildings, one shot and the other took poison. They did it because they lost all their money. I lost twice as much as they did, but I didn't jump out of any building, I didn't shoot myself, I wasn't poisoned... My mental attitude to this was to start immediately looking for that seed improvement. About the initiative you don't have to be very bright. You don't have to have such a wonderful education. You can be an outstanding success if you just take something a little that you have, either little or a lot, and start using it, get it up and running, do something about it and do something with it. And, of course, it requires initiative. About having a positive attitude Waiting is better than desire. Because the difference between hope and desire is that hope is the beginning to take on faith.
