jrib: ok, and if you click on a file in the folder? libreoffice and gimp were the only packages i could find that were going to require that black_: in nautilus, you have nautilus-open-terminal my ubuntu boots into text console and gives no boot i was worried i'd have to build myself a full-on chrooted system jrib: ah, ok, thanks chroot mlaci: in a terminal type "lsb_release -c" what does it report as? be sure to quote the response here. Zealous: can you boot into rescue mode? yes i can startx but i want to install drivers Zealous: are you able to mount /dev/sda1 i'm stuck on installing nvidia driver zykotick9: it says Distributor ID: Ubuntu Description: Ubuntu 12.04.1 LTS Release: 12.04 Codename: quantal Quetzal mlaci: okay, so "lsb_release -a" doesn't say 12.10 then. are you using nvidia or ATI video? and i can't install the drivers mlaci: ^ are you using nvidia or ATI video? Zealous: well, just reinstall X zykotick9: its intel graphics mlaci: then you should have no issue? no i can't mount do you get to a grub menu or do you get a black screen i see ubuntu in the top right and a login the grub menu has an option for rescue mode 520fdb1ae7
