

THE GREAT RESET IS PROMOTED BY USING WORDS LIKE:

Safety and Security / Green
Global Warming / Climate Change
Gender Equality / Sustainable
Eradicating Poverty / Racial Equality

They are good words and worthy goals.
But ...they mask the hidden agenda of
global control of all humans.

IS THIS THE FUTURE WE WILL LEAVE FOR OUR CHILDREN?

This is our watch! We need to be awake
to The Great Reset Initiative
and its long-term repercussions.

WHAT CAN WE DO?

1. Read this comprehensive and very
“determined” agenda for The Great Reset
from the World Economic Forum online.

2. Educate ourselves and others about the
infrastructure, by watching this YouTube
talk together with our friends:

“DisObedient: The Trojan Horse of the Digital
Panopticon” with Aman Jabbi
<https://www.youtube.com/watch?v=p1i3k-zrYWE>

It has inspired this brochure...

*“We must unlearn all that holds us captive
to this plan.”*

3. Share this brochure with love...
for our children’s sake. This is not political,
or national. It’s about safeguarding our
ability to live as free beings.

4. We can:

- * Say No, to a digital id and currency.
- * Say No, to infrastructure build out.
- * Safeguard our information: Cover all our cameras, turn off apps that use camera, microphone or tracking and use encryption: VPN Virtual Private Networks, turn off WIFI (at least at night).

5. Take action locally to address our global
concerns for the climate, equality, food,
water and other pressing issues. This is our
time to join together, and to step up to
face the challenges of these times.

6. This is a turning point. Pressure is
encroaching from the outside. Unless we
make a clear choice for our future, we will
have a world of external control, living as
prisoners to a faceless central authority,
overseen by Artificial Intelligence.

Or, by actively choosing a world of love,
cooperation, sharing and self-regulation,
we will remain free beings. When we put
our focus upon a new way of being
together on Earth, we will create a positive
future together.

What Are All Those Surveillance CAMERAS

Really for?

This flyer outlines what is
currently being implemented by
the
United Nations
World Economic Forum
World Health Organization
and Global Corporations.

Their comprehensive
plan for 2030 is called:

THE GREAT RESET

Are you aware of it?

WHY SO MANY CAMERAS?

Look up, look around... they are at stoplights, highways, airports, banks, office bldgs., schools, classrooms, parking lots, subways, hospitals, athletic facilities, grocery stores, checkout counters, shops, government offices, cell phones, computers, ring cameras, TVs, watches, and satellites.

Cameras, are also on products by Samsung, Apple, Microsoft, Amazon, Zoom & Facebook.

CAMERAS, MICROPHONES AND LOCATION TRACKING ARE KEYS TO THE GREAT RESET.

They scan our face and identify us using face recognition software, and artificial intelligence. They track and observe our movements and record our calls, texts and emails to assess and score us in order to create our social credit score. (Like they have in communist China.)

WHAT IS A SOCIAL CREDIT SCORE?

It is a score of all our identifying images, telephone recordings, financial data & more...that tracks what we do, say, buy and create; monitored by Artificial Intelligence and its algorithms of behavior. It rates us for our impact to the:

green, climate, sustainable, and equality agendas

laid out by The Great Reset.

AND WHY SHOULD I CARE? (I have nothing to hide.)

- 1.Because our social credit score will determine our access to: groceries, restaurants, cars, gasoline, telephone, internet, public transport, travel, education, healthcare, and more.
- 2.With zero-trust access we will have to be in compliance to buy and do things we now take for granted.
- 3.Everything on Earth will change, as a comprehensive external system of control, replaces our own internal guidance, self-regulation, and innate goodness. It will have the capability to make us prisoners in our own homes.

THE INFRASTRUCTURE OF THIS CONTROL SYSTEM IS BEING BUILT BY CORPORATIONS NOW:

It includes:

- * A Social Credit Score & digital i.d..
- * A cashless society.
- * A Central Bank Digital Currency or CBDC, every transaction may be monitored, approved or declined, and reported centrally.
- * Bright LED light poles with cameras, microphones, drone-police charging stations and more.
- * *"You will own nothing, and you will be happy"*- a World Economic Forum website quote.
- A Global Government owns and controls everything.
- * Full 5G coverage with land antennas and low atmosphere satellites reporting all data & camera images to centralized hubs.
- * "S.M.A.R.T. cities" where our money may not work beyond a 20-minute circumference surrounding our home, creating an "invisible geo fence" or an open-air prison.
- * Schools educate our children for compliance.
