Follow the instructions on the screen. After registering The DivX VOD it shows me this: Registration you must register the device to play DivX protected video. Registration code: ?????????? Sign up for - I open the URL and give me this instruction, REGISTRATION To play purchased DivX movies outside of your computer, you will first need to fill out one time of registration of your Certified DivX device. Find the DivX registration code commonly found under DivX VOD in the device's customization menu. Copy this 8 or 10-digit number down. (I already have the code) - Make sure you have the latest version (DivX Plus Software and v7.2 Mac) installed on your computer. (Do I need to install a player?) Open DivX Player on your computer and from the VOD menu, select 'Register a Certified DivX Device...'. You may be asked to log in or create a DivX account if your account information has not yet been stored in DivX Player. Follow the instructions in DivX Player to enter the registration code from Step 1 and create the device's nickname (such as The Bedroom DVD). DivX Player will upload a DivX registration video of the same name as your device's alias (such as Bedroom DVD divx). To complete the registration process, you must reschedule and play the registration video on the device. Windows users can use DivX To Go to stream registration videos to DVD or Blu-ray Player, TV or PlayStation 3. Windows and Mac users can record a movie on a CD (CD/DVD), copy a DivX movie to a USB drive (if the device supports USB playback) or even play video from your computer if you're using a network device. Once you play the registration file on your device, your registration is complete! ? Hello, Mine did not come with the PC Suite. There were problems with its connection to my computer. R Hello everyone, this is my first post here and the GT540 is my first SmartPhone. While I've played with iPhones and Galaxy S, I'm pretty much a novice with SamrtPhones. In the 2 weeks I've had it, the GT540 seems to be giving good bangs for bucks. I got it from CPWH; 100 pounds and 10 euros T-Mobile to top up. I was already on T-Mobile so I used my old SIM. I went to the list of apps and turned off all (I think) apps that will use 3G and I only use wireless from time to time to go to clean download some apps/games, send random Gmail, etc. I try to avoid using the Google portal as much as possible, but sometimes use it for Gmail and Android store. Anyway, I have some questions that I wonder if any of you can help me with... 1. The phone seems to take long-ish time (35 sec) to load... Either way, cuts this? 2. When using the phone function for the first time every day, if I hit Contacts, then it goes into a lengthy download procedure with the message Reading SIM Contacts ... this is strange since it is already listing all the contacts on the screen. I'm off the data synchronization... can it still try to sync with Google Online Contacts? 3. Is PayPal currently accepting payment for Google Apps? 4. Headphones actually produce a great sound... If I manage to screw them into the right position and keep them there;-) I think I'll buy another set (with a microphone)... any suggestions?
