

Technology Leadership Coaching

This service is designed for technology directors, coordinators, and managers.

Technology Leadership Coaching is designed to help technology leaders successfully lead digital transformations that require both educational and technical leadership skills. The service is responsive to the needs of the customer and designed to help current or aspiring technology leaders work through authentic digital transformation problems with expert guidance.

Features:

- Leading Technology Strategy
- Setting Goals to Improve Systems
- Communications Planning
- Building and Leading Teams
- Developing Teacher Leaders and Coaches
- Research and Development
- Building and Strengthening Relationships with School Leaders
- Being a Champion for Equity School-Wide
- Personal Productivity Strategies
- Engaging in Critical Conversations

Benefits:

The ultimate goal of this coaching engagement is to develop higher levels of performance through self-directedness, self-management, and self-awareness in leaders engaged in important change initiatives. This is especially important for those involved in innovation leadership where best practice is not widely known and leaders are likely to face adaptive challenges. We help leaders go deeper than simply “doing” so that they begin to learn from their practice and achieve sustainable results.

Engagement Overview:

- **Phase 1: Visioning and Goal Setting** - Connect with the vision of your school and its broader priorities. Define your vision, goals and outcomes for the work ahead.
- **Phase 2: Self-Assessment and Reality Check** - Know and understand your leadership style, strengths, and challenges. Examine your core values, beliefs, and assumptions about organizations, people, and change.
- **Phase 3: Planning and Strategy** - Develop a sound strategy and plan for communication and action with clear success criteria. How will you influence the changes you seek? What challenges and opportunities exist?
- **Phase 4: Action and Reflection** - Work the plan with continual reflection, data gathering, and ongoing communication toward a satisfactory conclusion.
