January 10, 2021 -

President Pedersen is actively making every effort to bring a COVID-19 vaccination site to the UFCW 876 union hall in Madison Heights for the members of 876.

Although still in the planning stage, this effort has many moving parts!

From adherence to federal and state requirements and CDC guidelines, coordinating requirements for the distribution, storage, administration and availability, while working with the Governor's office to name a few. It's a very fluid process and one that changes from day to day.

The Governor's pandemic vaccination schedule is subject to MDHHS and the Centers for Disease Control and Prevention recommendations. Which means modifications to the schedule do happen. What we do know is front line, grocery workers have been placed in Phase 1B and are considered a priority group. You can count on UFCW 876 for prompt notice.

Our goal is to provide a professional and cost-free experience in receiving both vaccines as required. Although we do not know what vaccine we may receive or when, the union is making every effort to be ready for the call.

Want to get notice first? Go to bit.ly/Update876 and update your member information. Stay in the know!
