

HOW TO SET UP PLATFORMS WITH LEGS AND CLAMPS:

Step One: With platform on its side, insert one leg in each of the (4) corners. Tighten bolts with a 9/16" wrench.

DO NOT OVER-TIGHTEN!

Step Two: Turn platform onto its legs

Step Three: Put platforms into desired configuration or layout.

Step Four: Attach (1) clamp between (2) platforms – see Clamp Installation instructions. For low heights, you can attach the clamps near the outer perimeter of the stage, instead of crawling under the decks to install in the center.
