View color images and more here. One of a kind on the Internet!!! You can find out more about this Swarovski service on our website. Most everyone who reads the Blog kristall Buzz knows that he is supported by Swarovski expert dealer Crystal Exchange America with the rare contribution of the famous Swarovski author Jane Warner. One of the most common questions we hear..... I have swarovski crystal figurines x, y, and z; What is the value of my Swarovski collection? First, I want the owner to completely forget about the price paid. The initial purchase price has absolutely nothing to do with either the selling price or the insurance replacement. Anyway, the price paid could be a sore spot in the real definition of the current value of the day as the collector/owner will be focusing on profits (or losses as it may be) in their mind rather than the real question, which is what is the value of my Swarovski figurine? The easiest scenario is when a collector needs to know the value of Swarovski to get adequate insurance. If so, we recommend purchasing these Swarovski books from [www.wbrb.com](http://www.wbrb.com). The Swarovski ERV in the book is specifically defined for collectors for use for insurance purposes. However, collectors should be aware that the cost of replacement fluctuates and that the concept of replacement costs should be reviewed annually. Citing an example ....if the figurine is on a secure brokerage site at \$500, it can have an ERV of \$525 or \$550. However, when most people ask about the cost, they ask what they can get by selling a Swarovski figurine. When selling, there are several considerations. Do you urgently sell (must sell now and have to sell quickly)? Can you sell at a more leisurely pace (3 to 12 months to conclude the sale in order) If you are in an emergency situation, you can usually expect that the sale price will be less than if the time is on your side. If you only have a few Swarovski figurines, this may not make much difference. However, if you have a substantial collection of Swarovski crystals there are 100 or more figurines, some of which AE or Swarovski NLE), liquidation prices can be quite painful for a wallet or personal expectations due to previous hype on the cost, often only about 10% or 20% of the price you could purchase figurines for a Swarovski broker like Crystal Exchange America. So our latest scenario is that Swarovski value through what you can get from a leisurely sale. To determine this, we first need to know the actual current trading prices. You can view completed transactions on eBay as a single source. When I talk about completed transactions, it can be a Buy Now or Auction style listing that has actually been successfully completed. This does not mean unsold figurines. Another option would be to look at figurines available with a reputable online dealer like Crystal Exchange America. If you look at their prices, remember that these are affordable prices, not sold statistics. So to be conservative, you can assume that they sell 10% less (not because the company is discounting, but because the cheapest sell and sold disappear from the website when they are no longer available). Using these two links and doing some mathematical averaging, you can roughly determine the true trading prices. Now that you have a trading price for a Swarovski crystal figurine, you can make some final calculations to see what you can get by selling a Swarovski figurine. Crystal Exchange America operates on a 20% commission (the minimum commission is \$25), so the seller gets \$400 for the statuette, which sells for \$500. Ebay also has a number of fees associated with using their services: The final cost of fees, which I believe is 10% of the sale price listing fees, must be paid even if items do not sell fees to use PayPal, which is practically required by eBay, about 3% or 4%. Using eBay is more of an effort to use for the seller, but it's really a logical option to get a worldwide exposure selling Swarovski crystal figurines. In our example of selling figurines for \$500, if the owner of the crystal will sell the figurine on eBay, the seller will receive about \$425 (using an estimate of 15% overhead to cover listing fees, FVF, and PayPal fees). So can you see that frequent question What is the value of my Swarovski Crystal Figurine (or collection)? has no simple answer. And the answer that goes with it certainly depends on how a person wants to use the term valence. This volume includes a full index for all three volumes. (There is no separate index for each volume.) The Swarovski book is divided into sections for different categories, and each part is assigned to the category. This makes finding parts in the book simple. The categories include: SCS members, animals, candlesticks, Crystal City, toys, music, and Swarovskicell Misaneous. In the description section, you'll read some very interesting facts about crystalline objects. For example, do you know there are (at least) 5 variations of the average mouse? Only Swarovski's descriptions and photographs in this Swarovski book allow the collector to accurately distinguish between the variations of the Middle Mouse. These variations can have a big impact on the Swarovski ERV, the lowest option having an ERV of \$100 and the highest having an ERV \$300! This is the perfect Swarovski price guide to store accurate inventory of your Swarovski collection and is acceptable for most insurance claims.
