PROFESSIONAL GRADE EVERYTHING.

FIREARMS
ACCESSORIES
AMMUNITION
SUPPRESSORS

Maxim Defense has become the go-to manufacturer for some of the toughest firearms in the world. This isn't by accident. By focusing on military environments, we ensure our products are dependable enough for everyone.

"Professional Grade" means the product can't fail. That is always our goal, even in extreme conditions. The term professional doesn't describe a job. It describes a user. Today's military, law enforcement, and citizens all have a need for dependable tools designed to last.

We started with an innovative CQB stock, expanded to dominating compact firearm needs, and have since developed quality match-grade ammunition, suppressors, and more. No matter your application, know that if it has the Maxim Defense name, it's been built to our professional grade standards.

MD9

When you're looking for Maxim Defense ingenuity in a new standard AR-9, the MD-9 is your answer. The MD-9 was engineered to fit the growing demand for cutting-edge AR9 style rifles for today's military and commercial market.

For increased comfort and versatility every MDX features our free-floating barrel with our custom handguard. These handguards provide a monolithic-like upper receiver platform and M-SLOT compatibility.

PDX 505-S

PDX™

Born from the SOCOM PDW solicitation, the Maxim Defense PDX is designed to handle the fierce demands of the Tier 1 community. It dominates close quarter encounters and achieves maximum energy on target. At just 18.75" in overall length, the PDX delivers groundbreaking power and performance in a sub compact platform.

At the heart of the PDX is our SCW system. This award-winning system cuts down the length of the stock to 4". The integrated BCG with interchangeable buffer weights gives you maximum performance and versatility without sacrificing form and functionality.

The PDX is also equipped with our HATEBRAKE muzzle booster. This patent-pending device significantly reduces recoil, decreases the flash signature, pushes gasses and concussion wave downrange away from the operator and improves overall performance in short barrel pistols and rifles.

MDX™

With the same heart and soul of the proven PDX, The MDX:508 and 510 models deliver maximum concealment and higher velocities.

The SCW and CQB systems play a key role in the compact size. The SCW stock adds a mere 4" to the end of the receiver with a full extension of 8.75", providing complete comfort to the operator. Our patented HATEBRAKE, proprietary bolt carrier group, and buffer & spring options ensure extreme durability and smooth cycling.

MSX SUPPRESSORS

The MSX suppressor line by Maxim Defense is specifically designed to minimize the increase in cyclic rate and gas blowback of a suppressed weapon system. Primary design features include the significant reduction of sound signature, decreasing flash signature, reduction of recoil and increase in accuracy.

RIMFIRE SUPPRESSORS

CALIBER

.22LR

COLOR

Black

Maxim Defense rimfire suppressors come in two flavors. The venerable MKIV-SD complete suppressor package and the DRF:22 standalone suppressor each offer amazing sound suppression while encouraging clean operation and reduced blowback.

| SPECIFICATIONS | DRF:22 |

PRS

The PRS suppressor is designed to be the lightest suppressor for competitions and hunting. Unparalleled strength in design, achieving a previously impossible strength to weight ratio.

SPECIFICATIONS

| | PRS |
|------------------------|---|
| AVAILABLE CALIBERS | .308 Win, 6.5 Creedmoor |
| FIRING SCHEDULE | 20 rounds @ 1 round per second, allow to cool |
| CONFIGURATION | Direct Thread |
| LENGTH | 7.9" |
| LENGTH ADDED TO MUZZLE | 7.25" |
| DIAMETER | 1.75" |
| WEIGHT | 10.8oz |
| MATERIALS | Grade-5 Titanium, 7075-T6 Aluminum |
| FINISH | Cerakote®, DLC (Diamond-like coating) |

FEATURES

1.

State-of-the-art MonoKore design
2.

Simple 3-piece design
3.

Military grade materials
4.

Adds 7.25" to the muzzle
5.

Suppressor core has integrated carbon cutters for tube cleaning
6.

Fully and easily serviceable, disassembles with common tools
7.

Drops sound to well below hearing safe levels
8.

Increase reliability and longevity with host firearm due to low gas blow back and low gain in host weapon cyclic rate compared to traditional suppressor designs
9.

Ships with 5/8-24 direct thread mount
10.

Decreases flash, decreases recoil, increases accuracy

CENTERFIRE SUPPRESSORS

| CALIBERS | | |

| AVAILABLE CALIBERS | 5.56 NATO, .308 Win, 6.5 Creedmoor |
| FIRING SCHEDULE | Full auto rated, 8.5" barrel restriction |
| CONFIGURATION | Direct Thread |
| LENGTH | 7.9" |
| LENGTH ADDED TO MUZZLE | 7.25" |
| DIAMETER | 1.75" |
| WEIGHT | 21oz |
| MATERIALS | Grade-5 Titanium, 17-4 SS |
| FINISH | Cerakote [®] , DLC (Diamond-like coating) |

FEATURES

1.

State-of-the-art MonoKore design, Simple 3-piece design
2.

Military grade materials
3.

Adds 7.25" to the muzzle
4.

Suppressor core has integrated carbon cutters for tube cleaning
5.

Can be pinned to a 10.3" barrel to effect a 16" overall barrel length
6.

Fully and easily serviceable, disassembles with common tools
7.

Secondary retention feature for suppressor tube
8.

Drops sound to well below hearing safe levels
9.

Increase reliability and longevity with host firearm due to low gas blow back and low gain in host weapon cyclic rate compared to traditional suppressor designs
10.

Repeatably tested with SOCOM tables down to 8.5" 5.56 NATO with no damage or significant change in sound reduction

MSX 240 SUPPRESSOR

| CALIBER | COLOR |
|--------------|-------|
| 7.62x51 NATO | Black |

MSX 240

The Maxim Defense MSX M240 suppressor is specifically designed to minimize the increase in cyclic rate and gas blowback of a suppressed weapon system. Primary design features include the significant reduction of sound signature, decreasing flash signature, reduction of recoil and increase in accuracy.

During installation, the suppressor locks into place with a specific torque on the core, then is pinned onto the barrel for absolute assurance of installation. When installed to spec, this method ensures the suppressor will not loosen during fire.

SPECIFICATIONS

| | MSX 240 |
|---------------|--|
| CONFIGURATION | Made specifically for FN M240 belt-fed machine gun |
| LENGTH | 10.7" overall length Adds 10" to the muzzle (including integrated .75" flash hider on suppressor) |
| DIAMETER | 2.05" |
| WEIGHT | 62.2oz |
| MATERIALS | 17-4 H900 Stainless |
| FINISH | DLC (Diamond-like coating) |

FEATURES

1. State-of-the-art MonoKore design
2. Self-torquing during fire
3. Military grade materials
4. Adds 10" to the muzzle
5. Simple 2-piece design
6. Specifically designed for 7.62x51mm MMGs
7. Increase reliability and longevity with host firearms due to low gas blowback and low gain in host weapon cyclic rate (4% cyclic increase on FN M240 Lima)
8. Drops sound to well below hearing safe levels
9. Decreases flash, decreases recoil, increases accuracy
10. Fully and easily serviceable
11. Disassembles with common tools

- 2. Steel QD limited rotation sling swivel mounts
- 3. Provides monolithic like upper receiver platform
- 4. Free-floating design

ACCESSORIES

M-RAX™

Unlike the traditional M-Slot mounting systems, M-RAX™ utilizes the full slot of your rail, maximizing space. This makes the M-RAX™ system end-to-end stackable, giving you the option to create seamless monolithic rail sections where needed. Spring-loaded screws remove mounting frustrations. Simply push the screw in with a standard hex tool and rotate 90 degrees. The locking lugs engage that easily.

Simple push-and-turn install with the spring-loaded screws.

HATEBRAKE™

Maxim Defense HATEBRAKE™ muzzle booster is designed to regulate firearm exhaust gases to ensure PDW's cycle more reliably. It redirects the sound signature and decreases the flash signature while significantly reducing recoil and increasing accuracy.

HANDSTOP

Our hand stop is machined from 6061-T6 aluminum and features our patented M-RAX mounting system for fast and easy installation. It can be used as a traditional hand stop, barrier support, or as an indexing point for your support hand. Fits all M-Slot compatible handguards.
