Windows does not connect to any network in the run and takes about 10-15 minutes (sometimes even more) after I log into my account to connect to the Wi-Fi network. I was hoping that a driver update for my Lan wireless adapter would solve this problem, but I couldn't find a driver for Broadcom 4313 802.11 b/g/n for Windows 8.1.please share a driver reference or any other possible solution. Thank you. Facebook's zenith
