# Achieving the 2030 climate goals: One-stop-shops for multi-family building renovations

**Date and time:** July 8<sup>th</sup> 2021 at 14:00 to 15:15 (CET)

## Overview

Multi-family buildings represent 47% of residential dwellings in the EU. However, the sector remains largely overlooked in terms of sustainable renovations and energy retrofits, despite a growing need for them. As such, this webinar will provide insight into how cities and regions can overcome the barriers often present when promoting and supporting multi-family renovations in various socio-economic classes. A benchmarking study will provide a market overview of home renovation programs within Europe, while in-depth case studies from Spain, France, and Belgium will be featured. These examples will demonstrate how communities in partnership with local stakeholders can carry out high-performance renovations on the residential building stock and will offer practical solutions for increasing the uptake of multi-family building renovations. Additionally, the webinar will highlight an innovative approach to energy poverty and urban regeneration. Themes within this webinar will also revolve around the Renovation Wave strategy, related EPBD revisions, and how to best use the EU recovery funds.

Register now to learn more about the future of multi-family building renovations!

## Who should attend and why?

Cities, regions, energy agencies, and other stakeholders setting up residential renovation programs for multifamily buildings within Europe are welcome to join. Learn more about achieving climate neutrality by increasing the renovation rate in a poorly served sector that presents great opportunities for reducing energy-related emissions.

**Moderator:** Mara Oprea, Business Analyst – GNE Finance

## Speakers:

Jonathan Volt, Project Manager – BPIE

Kristina Klimovich, Head of Advisory and Consulting – OpenGela

Raphaël Claustre, General Manager – Île-de-France Energies

Roel Vermeiren, Renovation Strategy Advisor – Flemish Energy and Climate Agency

## Agenda:

14:00 – Introduction to the series and the webinar by Mara Oprea

14:05 – Turnkey Retrofit's benchmarking study presented by Jonathan Volt

14:15 – Case Study: OSS model presented by Kristina Klimovich

14:25 – Case Study: Île-de-France Energies presented by Raphaël Claustre

14:35 – Case Study: Flanders initiative and BE REEL! project presented by Roel Vermeiren

14:45 – Q&A and Conclusion
