Urry Lisa Urry (Chapter 1 and Unit 1 and 2) is a Professor of Biology and Chair Mills College Department Oakland, California, and a visiting scholar at the University of California, Berkeley. After graduating from Tufts University with a dual degree in biology and French, Lisa completed her PhD in Molecular and Developmental Biology from the Massachusetts Institute of Technology (MIT) at the MIT/Woods Hall Oceanographic Institute Joint Program. She published a number of scientific papers, most of which focused on gene expression during the embryonic and larval development of sea urchins. Lisa has taught a variety of courses, from introductory biology to developmental biology and senior seminars. As part of her mission to raise awareness of evolution, Lisa also teaches a non-major course called Evolution for Future Presidents and is on the Teacher's Advisory Board for the Site Understanding Evolution, developed by the University of California Museum of Paleontology. Lisa is also deeply committed to promoting opportunities for women and underrepresented minorities in science. Lisa is also the co-author of Campbell Biology. Michael L. Kane Michael Caine (Chapter 1 and Unit 3, 4 and 7) is an ecologist and evolutionary biologist who currently writes full-time. Michael holds a degree in Biology and Mathematics from Bowdoin College, M.Sc at Brown University and a Ph.D. in Ecology and Evolutionary Biology from Cornell University. As a lecturer at the University of New Mexico and the Rose-Hulman Institute of Technology, he has taught a wide range of courses including introductory biology, ecology, evolution, botany and conservation biology. Michael is the author of dozens of scientific papers on topics that include feeding the behavior of insects and plants, long-distance seed scattering, and speciation in crickets. In addition to his work on biology campbell and Campbell biology in Focus, Michael is also the lead author of a textbook on ecology. Steven A. Wasserman Steve Wasserman (Chapter 1 and Block 6) is a professor of biology at the University of California, San Diego (UCSD). He holds a bachelor's degree in biology from Harvard University and a doctorate in biological sciences from the Massachusetts Institute of Technology. Through his research into the regulatory pathway mechanisms in Drosophila fruit, Steve has contributed to the biology of development, reproduction and immunity. As a lecturer at the University of Texas Southwestern Medical Center and UCSD, he has taught genetics, development and physiology to undergraduate, graduate and medical students. He currently focuses on teaching introductory biology. He has also served as a research mentor for more than a dozen doctoral students and more than 50 aspiring academics at the undergraduate and high school level. Steve was the recipient of outstanding academic awards from both the Markey Charitable Foundation and the David and Lucille Packard Foundation. In 2007, he received the UCSD Award for Training. Steve is also the co-author of Campbell Biology. Peter W. Little Peter Small (Chapter 1 and 5th Division) is a professor of biology at Mercy College in New York City, where he teaches introductory biology, evolution, ecology and botany. He holds a bachelor's degree in biology from Vassar College and a doctorate in plant physiology from Cornell University. He is also a scientific writer for the journal Plant Physiology. After receiving a scholarship to the University of Wisconsin at Madison, Peter taught at Kenyon College, Union College, Western Connecticut University and Vassar College. His research interests relate to how plants feel about environmental change. Peter received the 2008 award for teaching excellence at Mercy College. Peter is also a co-author of Campbell's Biology. Jane B. Rees Head of the Author's Team for the latest editions of Campbell Biology. Jane Rees was a longtime collaborator of Neil Campbell. Jane has previously taught biology at Middlesex County College and community college in queensborough. She holds a bachelor's degree in biology from Harvard University, a bachelor's degree in microbiology from Rutgers University and a Ph.D. in bacteriology from the University of California, Berkeley. Jane's research as a graduate student and graduate student focused on the genetic recombination of bacteria. In addition to her work on Campbell's biology in focus, she was a co-author of Campbell Biology, Campbell Biology: Concepts and Compounds, Campbell's Basic Biology, and The World of Cells. Neil A. Campbell Neil Campbell (1946-2004) combined the investigative character of a research scientist with the soul of an experienced and caring teacher. He holds a bachelor's degree in zoology from the University of California, Los Angeles, and a doctorate in plant biology from the University of California, Riverside, where he received the Distinguished Graduate Award in 2001. Neil has published numerous scientific articles about desert and coastal plants and how sensitive plants (Mimosa) and other legumes move their leaves. His 30 years of teaching in various environments included introductory biology courses at Cornell University, Pomona College and San Bernardino Valley College, where he received the first Distinguished College Professor Award in 1986. Neal was a visiting scholar at the Department of Botany and Plant Sciences at the University of California, Riverside.
