## Boult audio tru5ive manual

AgenciesBoult Audio Tru5ive comes with a charging case. Boult Audio Tru5ive Price: Rs 3000 (plus taxes) Rating: No 1/2 Specs: Wireless Headphones, Bluetooth 5.0, IPX7 proof water, 55mAh battery, 7.5 grams each, 650mAh battery case, 55 grams (weight case) Boult Audio was one of the first brands to launch wireless headphones with the latest Bluetooth 5.0 connection with Tru5ive. Tru5ive is the company's first true wireless stereo (TWS) headphone-style headphones. Boult took care of most of the issues that TWS headphones suffer from in the design department. Not only will you get angular headphones that sit comfortably outside the ear canal, you'll also get the ability to headphones and headphones to attach for a safe fit. In addition, you get headphones and headphones in the version of gray, neon green and pink color options. The headphones have an indicator of lights on the back along with a power button that doubles for pairing - we liked that the button gave good tactile feedback. We used headphones with headphones and found that they were comfortable to wear plus they didn't get loose and fall out while running/running. Since they're IPX7 certified, you don't have to worry about headphones getting wet with water/sweat either. As with most TWS headphones, Tru5ive also offers a charging case. We liked that Boult Audio chose a clear top cover - it makes it easy to view the state of charging headphones in case. The charging case has a 650mAh battery and supports storage of headphones with headphones or headphones attached - intelligent implementation. There is an indicator of the charging level plus a button to see the current level of battery on the case. On the side is a microUSB port for charging. Because headphones use Bluetooth 5.0, they don't have to be connected manually to each other. You just need to take them out of the charging case and they automatically connect to each other first followed by connections to your paired smartphone/computer. Another advantage of Bluetooth 5.0 is that Tru5ive allows you to hear voice calls on both headphones, not just one earpiece - another question about most other similar price options. The sound quality is a mixed bag. While Boult claims that the headphones have built-in micro woofers for extra bass, we found that bass level to be average. It's not as deep or pounding as we expected. Also, there is audio/video synchronization delays with the video streaming service, which is a bit disappointing. Audio clarity is where the headphones score - we liked the clear output, which is well balanced. The built-in microphone works well for voice calls as long as you're not in a noisy environment. Battery life is also great. One charge gave us 4 hours of battery life (70% of the volume). With the case of charging, you can recharge the headphones 3 times - meaning that you can have more than 12 hours of playback on a single charge. Overall, Boult Tru5ive wins on design, but mixed sound performance is disappointing. At the same price, we recommend you consider noise shots or Nu Republic Jaxxbuds. Image not available forColour: Image is not available forColour: Choose #LiveBoult When you #LiveBoult, you live BOLD, you live fearlessly, you live the best versions of yourself. You see adventure in everything you do, whether it's grooving, traveling, reading, or just being. You stop just existing and start living in every moment. Flipkart Internet Private Limited, Alyssa Buildings, Begonia and Carnation Embassy Tech Village, Outer Ring Road, Devarabeesanahalli Village, Bengaluru, 560103, Karnataka, India CIN : U51109 KAKA2012PTC06107 Phone: 1800 208 9898 This Audio Boult Truive5 another true Bluetooth 5.0 food. But what makes this unique is the ear loops, which helps keep the headphones safe. You can buy from Amazon for Rs. 2819 - there are many true Bluetooth headphones/headphones on the market, but most come without loops and the common question that many users face is that if headphones fall, especially when traveling in a crowded area. With earloops the headphones will be confident and won't fall easily. So that's an added benefit. Boult Audio Tru5ive specs 100 percent waterproof 5.0 Truly Wireless: Listen to music really wire free with Bluetooth 5.0 Tru5ive Stereo TWS form factor that is completely waterproof Built into the microphone: Built-in HD capacitor MIC for calls and Siri/Google voice command; Although the call function only works for 1 earpiece (Mono audio) Auto pairing: Automatic pair with the device as soon as you take them out of business. No need to manually pair to the device every time the interchangeable ear loops are: Tru5ive comes with 3 colored ear loops; Green, grey and pink; Simply change the ear loop on your headphones to suit your color preferences boult audio tru5ive user manual
