Tuy Senior High School

ABSTRACT

Time management and punctuality are crucial factors in maintaining school efficiency, yet traditional reminder systems often fall short in ensuring timely task completion. To address this issue, TuSeRawr was developed as an innovative real-time automatic wired reminder system designed to enhance school efficiency through scheduled audio prompts. This system integrates customizable sounds and an automated scheduling mechanism, ensuring that students and staff adhere to their daily routines effectively.

By implementing TuSeRawr at Tuy Senior High School, this study evaluates its impact on classroom punctuality, attendance tracking, task completion, and overall time management. Using a quantitative research approach, the study compares pre- and post-implementation data to determine improvements in school operations. The findings aim to showcase TuSeRawr's potential as a reliable and cost-effective solution for educational institutions seeking to optimize their scheduling accuracy and efficiency.
