

NS Accelerate

Cross-Industry ERP Acceleration Package for SAP GROW Fast

Value Realization in
less than **16 Weeks**

NS Accelerate

SAP-Qualified Partner-Packaged Solution (QPPS) for SAP GROW Fast by Nirvasoft

A **fast, structured, and scalable ERP implementation** approach designed to help growing businesses modernize operations with speed, visibility, and operational control.

Built on SAP GROW Fast, NS Accelerate delivers a **future-ready SAP Cloud ERP AI foundation** with fit-to-standard processes, embedded AI capabilities, predictable implementation timelines, and reduced project complexity.

With NS Accelerate, businesses can now engage with a proven operational foundation designed to scale as the business grows.

What NS Accelerate Delivers

Outcome Area		Business Impact
Faster Time-to-Value	14-16 weeks	Go-live in less than 16 weeks with a structured implementation approach
Cost Efficiency	60% Lower	Up to 60% lower implementation costs through a streamlined delivery model
Reduced Complexity		Fit-to-standard, accelerator and best practices eliminate customization and minimize project risk
Execution Confidence		Fixed implementation structure with proven SAP GROW Fast methodology
Future-Ready Foundation		AI-ready SAP Cloud ERP with embedded analytics and scalable business processes

Are You Hitting the “Growth Wall”?

Many growing businesses operating on legacy systems or disconnected platforms face the same operational barriers:

Limited real-time
visibility
across departments

Spreadsheet-heavy
reporting and
manual processes

Increasing operational
complexity as the
business scales

High maintenance
overhead from
outdated systems

Limited readiness for
AI, automation, and
future innovation

NS Accelerate offers the business outcomes you need, delivered in the timescale you expect - providing a solid foundation to scale your business efficiently and sustainably.

Built for Growing Businesses Across Industries

Finance • Procurement • Sales • Supply Chain • Operations

A Different Way to Approach ERP Implementation

Traditional ERP projects often become slow, unpredictable, and overloaded with customization before businesses see real operational value.

NS Accelerate is designed differently.

Built on **SAP GROW Fast** methodology, the package focuses on delivering a stable, future-ready ERP core quickly through predefined scope, standardized processes, and accelerated deployment.

Instead of spending months redesigning operations from scratch, businesses start with proven SAP best practices that reduce implementation complexity and accelerate operational readiness.

\$SGD 65,000

depending on the users

- For minimum 15 users*
- Prices varies on the number of users required
- 1:1 pricing model
- Minimum 3 years contract
- Implementation cost equal to 1st year SAP License Subscription

NS Accelerate vs Traditional ERP

Dimension	NS Accelerate (SAP GROW Fast)	Traditional ERP Implementation
Implementation Time	14-16 Weeks	6-18+ months
Time to Value	< 90 days	6-12+ months
Cost Structure	Fixed scope, predictable cost	Variable, often increasing mid-project
Implementation Cost	40-60% lower	High (customization & long cycles)
Deployment Approach	SAP GROW Fast	Custom / hybrid methodology
Process Design	Fit-to-standard	Heavy customization & redesign
Risk Level	Lower (controlled scope)	Higher
System Model	SAP S/4HANA Cloud	legacy + hybrid complexity
Scalability	Built for phased expansion	Difficult due to technical debt

Implementation Timeline Comparison

BEST FIT FOR

- Growing Mid-Sized Businesses**
Establish core processes quickly with room to scale.
- Moving from SAP B1 or Legacy Systems**
Modernize operations without carrying forward complexity.
- Time-Sensitive Transformation Programs**
Meet operational, compliance, or expansion timelines.
- Preparing for AI & Automation**
Build a future-ready ERP foundation for intelligent operations.
