

Aqua Jump

DIAMOND

The Hydrorider Diamond Aquajump is a professional trampoline produced with excellent materials, starting from the 316L stainless steel frame, and with an innovating design specifically conceived for pool facilities.

This equipment allows you to enjoy the multiple benefits of water exercise, combined with coordination and fun: reduced stress, muscle relaxation, blood flow stimulation, and water massage. Thanks to these advantages you can get great results in terms of physical training, weight loss, body balance, tonification and rehabilitation.

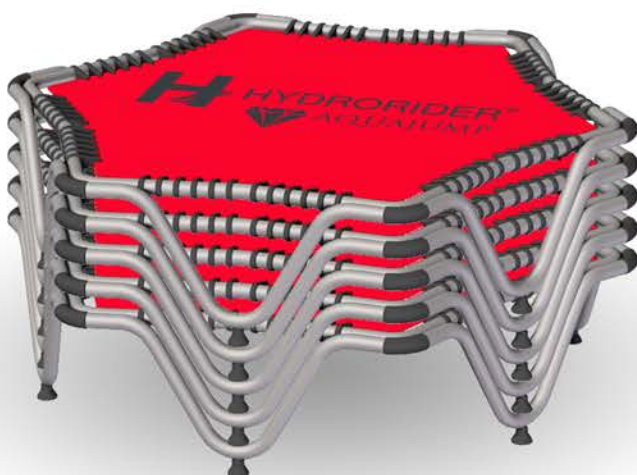

Product Features:

- Reliable and durable in the long run
- Suitable for continuous daily use
- Vulcanized rubber suction caps on the bases allow great adhesion and protection of pool floor
- Easy, smart and secure piling
- Very reduced storage space needed
- Shock-resistant rubber bumper
- Minimum maintenance

Technical features that allow high performance in all applications: group classes, circuits, personal training, recreation, wellness and rehabilitation.

AISI 316L
