Marcia Oliveira Healing® by ordering a class that you agree to terms and conditions, all rights reserved. Marcia Oliveira Healing® Access Bars® is an amazing treatment that involves gently touching 32 points on her head. It supposedly releases anything that does not allow you to get. These moments (aka bars) contain all the thoughts, ideas, beliefs, emotions and considerations you have kept in any life. This is an opportunity for you to let go of everything! I know it sounds there, but hang out there as it's explained more... Each session ® can release restrictions in the area of your life, which corresponds to a particular bar, touch it. It's an incredible nurturing and relaxing process, lifting restrictions in all aspects of your life that you're willing to change. How much of your life do you spend doing rather than getting? Have you noticed that your life is not yet what you would like it to be? You can have whatever you want (and even more!), if you're willing to get a lot more and maybe do a little less! Getting Bars® will allow this to start appearing for you. The book Session Access Bars® has helped thousands of people change many aspects of their body and their lives, including sleep, health and weight, money, sex and relationships, anxiety, stress and more. At worst, you will feel like you have just had a phenomenal massage. At best, your whole life can turn into something more with complete ease. Some compare the brain with a computer and treat ® with a disk defragmentator. Bars (points on the head) correspond to different areas of the brain (computer files) that relate to aspects of everyday life, such as joy, creativity, money, control, networking, calmness or gratitude, etc. We carry our own limiting thoughts, beliefs, emotions, and patterns in these areas (such as junk files, or spam) based on judgments absorbed from society, family culture, friends, and personal experiences. Ideas about good and wrong, good and bad, prevent accepting life as it is and making changes that empower us. We may even know well how these judgments take us away from the center, from our inherent connection to integrity and one purpose. When a specialist access bars® practitioner touches the bars on a person's head, an electrical charge in the brain that these fabricated judgments are dispersed (i.e. unwanted files are deleted!). The patterns and programs we have taken on make us respond to life on autopilot, with unconscious resistance to the very experience to which we are most long. Once cleared, we become free to function again with clarity and awareness, getting who we really are without fear and obstacles, and open to entirely new perspectives of opportunity. Studies have shown that bars® treatment slows brainwaves to state themes allowing behavioral patterns and childhood perspectives to surface and be released, and a greater state of presence, benefits and openness to arise. Restrictions on thoughts, beliefs and feelings can be undone, including fears about money, blocks for creativity, difficulty getting, residual grief, or any other habits that no longer work for you. Bars® are a tool that facilitates another way of functioning on the planet. For millions of years, people have functioned from the density of their thoughts, feelings and emotions. It's something that people identify with, it's something that people have made valuable. The more you get your bars to work, the more you start to perceive how much effort it actually takes to function from thoughts, feelings and emotions. You also begin to perceive the possibility of functioning from perception, knowledge, being and receiving. For most people, get their bars run for the first time is that they actually allow themselves to receive without commitment and consideration. If you're feeling down or not in your side, I highly recommend trying a session with Laura. This will open up opportunities for you and allow you to get them. Very recommended! Crystal O'Connell Almonte, Ontario's like activating a computer virus consciousness! Bars can be used to facilitate change in all areas of your life. When you are ready to function from greater consciousness, you begin to open the door to all healing. Science tells us that the shape of your cells actually becomes more elliptical when they are influenced by thoughts, feelings and emotions, which is the first step to dis-ease. When you get your lawyers to run, it opens up this effect on cells allowing cells to return to their more spherical form promoting more lightness in the body. At this point, you may think (or judge) that this seems very woo-hoo Laura, and I totally understand that. Its effects can just be anecdotal or placebo - I was there once too until I had my bars run for the first time. Stay with me... for some factual science. Access Consciousness® tools including bars® are used by psychologists, psychiatrists, physiotherapists, family therapists, massage therapists, acupuncture, chiropractors, business trainers and ordinary people to create simple quick changes. Check out this 11-minute video below where neuroscientist Dr Jeffrey Jeffrey Fannin is in high spirits to share the exciting changes he's seen using Brain Mapping with thermography, before and after getting their bars run. Contact me to find out more! In 2015, Dr. Lisa Cooney and Linda Adamowski used Thermometry as a means to find verifiable evidence to show the physiological changes that Access Consciousness creates® the process of accessing the body®. It's a 15-minute video. Still curious or doubtful? Book a session and find out for yourself. Discover... What else is possible? What is Bars? Expand The Bars is a series of 32 dots on the head that, with a light touch, release old energies stuck in the brain and body, allowing for huge and light changes. What does the Bars session do? Expand The Bars accepts all considerations, thoughts, feelings, emotions, decisions, judgments and beliefs from any life that is electrically stored in the brain and releases them. This release occurs when the bars are touched; This allows that kept junk to be released. It's like defragging a computer - it works smoothly, better, and everyone is happier! Just when the lights are out in your home and you flip the switch or switch the trip to make the lights light: with the bars done allowing your lights to come on. The energy of the universe becomes available to you, and this often leads to greater peace, lightness, joy and glory in life. Is there science behind the bars? Expand Several physicians who are experts in biofeedback have reported changes in their brainwaves, moving from beta to much more relaxed theta waves during a one-hour session. Bars change the electrical function of the brain. To hear renowned neuroscientist Dr. Jeffrey Fannin discuss what blew him up when he checked what was going on in the brain after a single access bars session, go here! What can we expect after receiving Barca? The Expand Every Bars session is different. The worst thing that can happen after a bar session is you feel as relaxed as if you got a great massage. The best thing that can happen is your whole life can change. Among the most frequently reported effects: an increased sense of peace and ease of a less reactive situation that could have upset you in the past more calm and deep sleep feeling that anything that upsets before a session doesn't matter anymore. How long does the Bars session last? Expand Usually Bars session can last 60-90 minutes, although this can vary, and it's always better to do bars even if it's within 20 minutes than not doing them at all! How long does the Bars session last? Expand Once you have bars done, bars run or continue to release stuck energy forever. Every time you do it after that, the effect becomes more dynamic. The most dramatic effects are usually noticed 3-4 weeks after the session. How often should you have your bars done? Expand This is entirely up to you. You, well you would like to feel? How easy would you like your life to be? Some bars are facilitators wondering why we don't all do it every day! Most would like to see their bars work at least once a week, or whenever they feel stressed, cranky, or out of sorts with the way their lives are going. After any kind of serious shock or injury or energetic shift of any kind this is another time to consider whether your bars are done. Who can benefit from what their Bars have done? Expand Can Kids and Babies Make Their Bars? Expand Children and babies benefit phenomenally from having their bars run. They are more like animals than adults, which means that they are often more willing to have rapid changes in their bodies as well as in their way of life. It is worth noting that children's bars can work very quickly. Babies are even faster! Can I do bars during pregnancy? Expand absolkoi! (From a legal point of view, of course, we should invite you to ask your doctor first.) According to women who did their bars during pregnancy, especially on a regular basis, they had short and light births, and many of them avoided caesarean section. Is Bars International? Expand! It's in 171 different countries! How much does a Bars session cost? Expand The cost of a Bars session depends entirely on the presenter who gives it to you. If you're looking for a few sessions, I'll find a package to help make it more affordable. Otherwise, see my Lifestyle Services page for running costs for a 50 or 75 minute session. Do Barca have a negative impact on mental or psychological problems? Expand Many people who have had mental and psychological problems have been able to weed themselves away from medication and experience amazing changes in their problems. Of course, we recommend that you consult your doctor before you stop mind-altering drugs. How do you know what to expect from what your bars have done? Expand You Don't! Each Bars session is different and there is no way to predict exactly what will happen. The guidelines that are best applied are that the worst thing you will feel like you have had a great massage, and the best thing that can happen is your whole life can change. Can bars cure physical ailments and pain? Expand The Bars facilitate a consciousness that can change almost any of them. Some of the physical ailments that have changed in one bar session include scoliosis resulting in a 1-1/2 increase in height, a change in pigeon legs that doctors recommended surgery, and the relief and disappearance of all kinds of pain and pain throughout the body. Many people have used bars in conjunction with other mind access tools to make incurable diseases including cancer, arthritis, fatigue, depression, bipolar disorder, disappear. Again, you don't! Symptoms or illness will disappear when you and your body are ready to release considerations (thoughts, feelings, emotions, beliefs, decisions and judgments from any any that keep the undesirable state in place. This process is not linear, which means that the condition that one person let go in one session can take many sessions for another person, and there is no wrong in doing so. It's just different. However, you can ask a specific session of bars to address specific symptoms or questions. The results are determined by the person receiving the Bars session and their bodies. Please ask me before the session. When should you have your bars done? Expand whenever you like to feel great! People who practice bars for a while tend to get them done regularly, with an extra session when they have a naughty or difficult day. Although the dots may seem cranial or acupuncture points, they have different functions when done as part of the bars. Access Consciousness states, We have not seen any other method generate changes created by the Bars. Bars should be made solely of these other conditions inside the session, i.e. they are most effective made separately from the bars and vice versa. Do you have to lie down to get your bars done? No extension is required. This promotes relaxation for the receiver in most cases, as well as ease and comfort for the gift bars. If a reclining apartment is a problem, a reclining chair or lawn chair (zero gravity chair) can also work. For more frequently asked questions about bars, see Access Consciousness Blog articles Frequently asked questions about bars. Bars. access bars manual barras de access pdf
