# Xbt L1000 Software 17

DOWNLOAD: https://byltly.com/2ika3d

" Can not download the software or maybe the link is down". I don´t know how to solve this problem. A: I had the same problem, but after a couple of days I found a solution. Change the source code from http to https From: public static void main(String[] args) throws Exception { int x = Integer.parseInt(args[0]); URL or = new URL("" + x + "&version=L1000"); download(or); } To: Hope it helps! Q: How do I get a child node value using XSLT? I want to find out the value of the second child node of the B.A level of the tree I have and store it as a variable. XML This is A This is B1 This is B2 XSLT Output This is A Desired output This is B1 Here is one way using XPath 2.0, assuming the sample XML you provided is valid. XSL 520fdb1ae7
