## Tomtom 1ex00 reset

By Stephanie Breaux You if necessary perform a hard reset on your TomTom GPS device. A hard reset wipes all stored data from the device, including landmarks, addresses, favorites, and recent destinations. This option resets the device to factory settings. If you do this, it is impossible for a future owner of the TomTom to find out where you have been with the GPS. This is a very useful feature if you decide to sell your old TomTom or give it away as a gift. Press the On/Off button on your TomTom to activate the device. If it's already turned on, skip this step. Tap the Settings option and choose Change preferences. The Reset Factory Settings button must be displayed. If this isn't the way it goes, tap View all menu options. Tap the Reset Factory Settings icon. Tapping this icon resets the TomTom to the default settings in the factory and deletes all your stored data during the process.
