Origami frog pdf

Origami-Instructions.com joy once in a while, the origami frog looks neat and can also be done to jump. Did you do it origami? Comment and send a photo using the comment box at the end of this page! If you like it, you can also like origami jumping frogs. Origami Frog You can view our video below, or if you prefer, our photo instructions below that: Start with a square piece of origami paper (green makes convincing frogs). Now make a square base. Then insert your finger into one of the pockets in a square base. Move the pocket to the front, then flatten and change it. This classic origami move is known as squash times. The photo below shows one of the squash folds completed. Now perform squash times three more times..... As long as the piece is shaped like a diamond shown below. Next fold and spread the corners, as shown in the shown to make the folds. Next is another classic origami move, petal times. The next image shows the completed petal fold. Now make the petal three more times (on the other three faces of the diamond) to create a base of the origami frog. Fold the frog base down the central line, as shown. Then fold the lower edges of one layer into the central line. Now fold the edge from A to edge B, as shown in the arrow. Take the previous three steps again, another 3 times, until the part looks below the right. Now it's time to turn the tadpole into a frog! I like to pre-bend the leg and then use reverse folds to create two front legs (reverse folds are explained here). Now use reverse folds to stretch your hind legs. Apply reverse folds again, twice each on the front and back of a pair of legs, as shown in the photos below. Now you will need to blow up where shown to inflate the body of the frog. You can make frogs hop over short distances by tapping on the back of your body and then sliding your finger onto the table: O-ribit-gami! Check out many photos of the origami frog that have been presented by our readers! Did you do that origami? If so, upload your photo (2MB limit) through the comment box below. You can log in using Facebook, Twitter, Google or Yahoo accounts. These easy-to-follow instructions will show you how to fold a traditional origami jumping frog. This frog can actually jump quite far if you push down on it back! When you fold this model the paper will get pretty thick towards the end. Don't worry if your creases aren't completely perfect. The frog will still look good eventually and it will still jump. Step 1) Start with a square sheet of paper with the white side up. Fold it in half horizontally and un then Step 2) Fold the paper in half vertically. Step 3) Fold the paper in half vertically again and then unwrap it. You will use this fold as a guide in later steps. Step 4) Fold the paper down along the dotted line. Step 5) Crumple this crease crease and then unwrap it. Step 6) Fold the paper down along the dotted line. Step 7) Crease this crease well and then unwrap it. Step 8) Turn the paper over. Step 9) Fold the paper down along the horizontal dotted line. Step 10) Crease this crease well and then unwrap it. Step 11) Turn the paper over what it used to be. Step 12) Fold the paper down along the existing folds just as you do water bomb base.Step 13) Push everything down flat. Step 14) Fold the bottom of the paper along the dotted line. Step 15) Fold the left side of the paper to the center along the dotted line. Don't fold the top triangle. The paper will fit behind it. Step 16) Fold the right side of the paper to the center along the dotted line. Again, do not fold the top triangle, but lay the paper behind it. Step 17) Fold the bottom of the paper along the dotted line. Step 18) Fold the paper down along the dotted line. Step 19) Fold this crease well and then unwrap it. Step 20) Fold the paper down along the dotted line. Step 21) Crease this crease well and then unwrap it. Step 22) Pull two flaps of paper on the inside on both sides. Just like you do Boat Base.Step 23) Fold two flaps of paper on each side down along the dotted lines. Step 24) Fold the right top of the paper along the dotted line. This will make one of the frog's front legs. Don't worry about the corner folds. As long as you get a form like what you see in the next step it's normal. Step 25) Fold the left side of the paper along the dotted line to make the other front leg. It should match the other leg from the previous step. Step 26) Fold the bottom right of the paper along the dotted line. This will form one of the hind legs. This crease also doesn't have to perfectly fit the chart as long as you end up close to form on the next step. Step 27) Fold the left bottom of the paper along the dotted line to form another back leg. Step 28) Fold the entire model along the dotted line. Step 29) Fold the top of the model down along the dotted line. Step 30) Turn the whole model over. Completed by the traditional origami Jumping Frog.If you push down on the folds on its back you can make it jump! How did you do that? Post a photo of your frog in the comments and see how far you can make it jump! Level: Medium Push it back and release to make it hop! These happy origami frogs are a joy to make and a lot of fun to play with. Kids can click on the back and watch their frogs jump into the air! Why not create a few and race them with your family? You only need a piece of paper to get started - follow our turn-based instructions below to make your own frog. For more interesting ideas, take a look at our indoor activities. Top tip - not Push firmly on each crease when you make the crease. If you use use With only one colored side, start with the white side face up. Makes 1 origami frog prep 15 minutes you'll need colored paper measuring 15x9cm Googly eyes (optional) Step One method to fold the rectangle in half vertically and then unwrap. Bring the top right corner down to the left diagonally and turn around. Step two Bring the top left corner down to the right diagonally and turn around. Then turn the paper over. Step three Fold the top of the rectangle down where the diagonal folds meet, turn around and flip the paper over again. Step four Bring the sides to the center so they meet each other (this is called squash times). Then smooth out the top of the rectangle to make a triangle. Step five Fold the two corners of the triangle to the top of the triangle. Fold the left side of the paper to the center and repeat on the right side. Step six Fold two flaps at the top of the triangle in half so they indicate (as shown). Fold the bottom of the paper to the top corner of the triangle, then fold the paper down to the bottom edge. Turn it all around to reveal your jumping frog and finish by sticking some googly eyes or drawing your own with felt pen tip. Have you tried origami with your children? We'd love to hear in the comments below! Learn more ways to keep kids busy indoor activities for kidsAs to make puppet theatres tools kids can do as to make a bombasy bath for kids in today's post: Teach your kids how to make an origami frog that actually jumps! Origami jumping frogs are easy to fold and fun to play, i couldn't believe it when I realized last week that I never taught my kids to origami jumping frogs. I learned to dump them in sixth grade from a friend and we had a blast making frogs of all sizes and colors and then seeing whose frog can jump on and who can get her frogs to the ground on their feet more often. These cute little origami frogs are pretty easy to fold, so most older elementary children won't have any problems with them. My six-year-old was even able to do one with a little help. Keep reading for full instructions on how to fold your own origami frog jumps. Origami Frog: Supplies, like most origami, these frogs are a little easier to fold if you have actual origami paper, as it's nice and thin (it's a 120 sheet package only \$6 on Amazon - affiliate link), but you can really use any square sheet of paper. Once your frog folds up, click on the folded legs with the tip of your finger and then quickly slide your finger to let the frog jump. Depending on how hard you push your feet down, you Would get an origami frog to make one perfect flip in the air and land on your feet again. It's fun to try jumping frogs into targets, or just see whose frog jumps the furthest. How to fold folded origami frog I made the photo chart as clear as possible, so I should not try to explain every step. When you see the arrows, those show you which direction you should fold the paper, and the dotted lines show you the line once you do. Remember that you don't fold up to fit the paper with the dotted line you fold on the dotted line. For these frogs, we used 6 inches of square paper origami, and the frogs ended up about 2.2 inches. How to make an origami frog with these helpful instructions and diagrams. As you can see, this frog can be a little more difficult than other frogs because of the clearly defined legs and blow up the body. The legs require some delicate folds because of how thin they are. However, even if you do an ugly job on your feet you should still be able to do them. This origami frog is definitely awesome, and if you liked it, you should also try origami jumping frogs. Step 1: Start with a square sheet of origami paper, but if you only have regular 8.5x11 paper, follow these instructions to make a square sheet. Step 2: Fold the paper in half from the top corner to the bottom corner. Step 3: Fold in half again from left corner to right corner. Step 4: Run the squash once with the top flap. To do this, open the top flap and fold the right corner into the bottom corner, while fastening the sides. Step 5: Turn over. Step 6: Run another squash fold. To do this, make the left flap stand upright, then open and crush down. Step 7: Open the flap and make squash again on that as well. Step 8: Do this squash once three more times to the other flaps until you figure it looks just like this. Go to the next page to continue creating an origami frog.
