Rarity Slot Defense - Gender Fire Ice Thunder Dragon Head Chest Arms Waist Legs © 2020 Kiranico Whether you're new to the game or new to the monster hunter as a whole, I took some time to set this up for you. These sets are what I used when I played, since I didn't want to do any mixed/fashion sets up to the rank, and I'm definitely the friendliest beginner. Starting in Low Rank You have tetsucabra armor. Giving health and defense, it is definitely the most user friendly and indulgent. And that's why you shouldn't be surprised when you see that... Moving to High Rank Let's give the Tetsucabra armor! The High Rank version, of course! Same skills with better defense, and still a decent look for boot. Now, you've worn those Tetsu scales for what look like years, and you've finally toppled the snake with bronchitis. When you enter G Rank, you're ready. Ready for a new armor that doesn't smell like a dirty frog from the river. Well, here it is. Seregios! Health Up, Razor Sharp, Minds Eye and an easy get rid of slow sharper. This set will easily last up to G3, where you can start having fun with all the mixed sets the game has to offer. Really, I found this the easiest and most efficient way to get to G-rank and focus 90% of your materials on weapons. I'm sorry about the low-resolution images, as I'm pretty sure they're screened. Alas, good hunt for my friends! Here are some sets of gold gems in case you get yyy in Monster Hunter 4G/Ultimate. For rank G see my previous article: Rank: In general, the set progression is Velocidrome -&gt; Testukabra -&gt; Najarala -&gt; Gore/Ceanataur•Gore/CeanataurArmor: Ceanataur/Gore/Ceanataur/Gore/TestukabraSkills: Sharpness 1, Fast SharpenFamous set giving Sharpness 1 at the beginning of low rank! Huge! Legs can be anything that has Torse Up abilities, such as Alloy or Azaroth.———Alth degree: General progression becomes difficult when you start worrying about your weapon and specific abilities, and spells start playing a role. But general could be Jaggi S -&gt; Testukabra S -&gt; Double Gore -&gt; Rebellion Up. Azure Rathalos always gets an honorable mention as it's a great general set as well.•Double Gore:Gore:Gore S Helm, Gore Mail, Gore S Arm, Gore Fold, Gore S legsSkills: Bio Researcher, Sharpness 1, Challenger 2, Fire WeaknessStupidly weak to fire, but this set that mixes low and high-ranking Parts of Gore Magala is great. Not so hard to do and watch those skills.•Ribellion Up:Torso Up, Rebellion Mail, Torso Up, Torso Up, Ceanataur (and a charm with 3 slots)Skills: Honed Blade - Razor Sharp , Fast Sharpen , Use Sharpening [1] on the chest, sharp razor [1] x 2 and sharp razor [3]. Looking for power right after killing Dalamadur (rebellion)? This will give refined blade which is attach large and sharpness 1. Depending on your charm can do a lot. If you have a charm with Evade 5 you can do this beauty:Torso Up, Rebellion Mail, Torso Up, Narga, Torso UpSkills: Honed Blade, Evade 1, Fast Sharpen-Use a quick sharpen on the chest and evade [2] and quickly sharpen [1] gem on the waist. I hope it helps! Have a good hunt! List of armor skill list decorations A list of all armor pieces and armor sets available in the game. Armor is separated by low rank, high rank, G-rank, and its armor type. Event-only armor pieces and sets that do not fall under these sections are listed under Various Armor. In-depth information is fully present on the individual page of an armature. Select from the menu above to reference a specific level of armor sets or view the Elenco form below (Under Construction). The list form can be ordered using the English name of the armature, the Japanese name, the rarity, and the armor type. In Monster Hunter 4 Ultimate, equipping some armor combinations gives you more stats and abilities. These are armor sets. Although you can have each piece of armor with the same to complete a set, there are also custom sets. Custom Sets use the armor of two or more armor sets to give you a unique bonus. These can be better or easier to get than some full sets, at least for Low Rank. I will help you by listing some good armor sets to use in Low Grade, along with the materials you need to create them. This guide will go beyond some useful sets of Low Rank armor including: Jaggi Set - What are the pieces, when you can get it, and what you need to make it. Velociprey Set - What are the pieces, when you can get it and what you need to create it. Kut-Ku Velociprey Hybrid - What are the pieces, when you can get them and what you need to make it. Gore Ceanataur Hybrid - What are the pieces, when you can get them and what you need to make it. These sets are blademaster-oriented, but you can still create gunboat versions of them with the same materials. Jaggi SetSkills Sharpener - Accelerate sharpness.
