## Ghost recon wildlands trophy guide

In this phase you want to go for all the main story mission beats. Each region usually has 5-6 important missions. You can do it in any area from the beginning of this game. So if you want a challenge, you can go to 5 difficult areas and finish them first to gain massive experience. It is suggested that you play through the region through the region and end all the important missions in them. You can play the entire game solo or co-option. Just play and enjoy the game, and don't worry about any massabali trophies because there is no one. You can always replay the mission that you can complete to access specific parts that can help you with specific murder-related trophies. After the important campaign and kill all the important missions, you will be put back into the open world to complete all the side content in the game. This is where most of your time will go, as are tons of collective items, because every area is anywhere between 30-40 collective objects, you have to collect. There are trophies for all collective items except weapons modified/more items. These are there to boost your weapons, and do not need for any trophies. All the collective items can be revealed on the map by finds documents other than what is intel, or by reading the intel documents. The only collective items that you will have to revolve around documents and condiments. Both documents and conditions are usually in designated places or places you haven't visited yet (marked by one? For performance you can take a helicopter and fly relatively low and go to each of their designated locations. When you are close to these documents and pop up on your map. You can now try to perform supplementary missions to collect these collective objects, but to focus on one thing at a time to do it better. At this stage you want to do enough rebel operations missions to increase your rebel support skills at the maximum level. Doing so you should also have to get the life trophy to one of the other supplementary missions of all kinds. You want to buy all upgrades for all the skills in the game too, and reach the maximum level (30). You will undoubtedly reach level 30 while going for all other trophies. On this occasion you may leave a few murder related trophies, skydiving, etc. You can still get trophies related to your co-option if you've been playing solo the whole time. This is the opportunity to get these miscellaneous trophies and get your new gandi and shiny platinam trophy. Note: If you are playing the game naturally, you can unlock any of these miscellaneous trophies in the second stage! Useful links that will help you with the platinam journey: Special Thanks/Kardatspoorpen-They provided a useful trip on which to get a better Mousitrup Trophy Mission to run. Now you can either fly a helicopter, or go out to perform high aircraft and a skydrive in the air. Once you are near the ground, move your parachute on the ground safely. You can call the helicopter to get the rebel support capability until it leaves. Awesome video guide Pu! The helicopter shot an enemy out of the air with a marter. 21.66% extraordinary you need to get the rebel support skills shot to this trophy. When you finish your central mission in the first area of the game, this skill is automatically unlocked (Itako province). You can't miss it, because it's essential for mission story. Now trying to hit a real Hawaii and mobile helicopter is almost impossible because it will always move faster. The marter shot also takes a few seconds to ground. So the best way to do this is to go on one of the rebel option missions that you join in stealing an enemy

helicopter. Shoot at an enemy to alert all enemies, and wait for an enemy to approach the helicopter. As soon as you open the doors of your helicopter to an enemy, catch up on the helicopter and call in a strike with pressure. As the helicopter grows vertically in the air, it should be shot down. Pull! Video Guide Road a vehicle for 100 km Warravordruvi. 65.27% General This trophy is not satisfactory. You don't have to drive 100 km in the same vehicle. It is aggregate with all the vehicles you use. You definitely don't need this form because you will be driving these missions, objectives, and many more of the collective objects. When you are done with everything and you will probably be over a thousand kilometers. You will also lock this trophy away before you get the ability to call helicopters with your rebel skills for a car drop. Deadly Coravasinterrogatid 20 sources. 40.46% Unusual inmisablabable sources are people who have information during many important missions in the game. The sign is to visit with (you have not visited). Documents can be found at several places such as cities, enemy roads and fours, small camps, gas stations, villages, forms etc. They can be found pretty much anywhere which is the designated location. There are reports that people are earning a trophy before obtaining all the documents. I personally unlocked it when I still need 7 more documents. It's very lucky because some people still need to collect every document before the trophy. Another big problem with documents is the tracker/counter for how many you have collected. Some areas will have less documents that will show the trackor. For example, with my game in the media's Loona Region, my trererb said 9/10. But I could not find documents in this area now. The document was in another area. Keep in mind as to this trophy when you can't find the last document in one area, move to other areas and come back. You can pick it up in another area. It gives you enough time to throw a C4 and blast it. Now if you can't just hit enough enemies with C4, it may be that c4's explosion reaction is not just cutting for this situation. Buying blast radius skills, which is an epic skill, will make it very easy. You're not sure how to lock it Buy every skill once (you don't need the maximum skill). With these two additional skills, the trophy should be easy, but still can be a fanamy. The strategy is to use greed to bring enemies in close proximity to each other, then use the flybangs to blind them for a few seconds. It gives you plenty of time to go in the middle and have a my place. Now shoot it immediately to burst, kill you and all enemies in action. At least the trophy will be unlocked! It's anywhere near the earnings you need to acquire all the skills. Some of the high end needs 10-13000 resource units.
