(Written by Vincent Gillespie. Revised on September 28, 2026.)

Initial comments

The powers-that-be¹ have been steering humanity towards a nuclear third world war, they want to greatly reduce the human population, and they have been perverting everything. Alexander Paramonov has come into this world as a matter of Divine Intervention to thwart these demonic plans and to instead lead humanity (or as many people as possible) into a New Golden Age, a *Bright New World* in which truth, justice, harmony, wisdom, abundance and happiness will predominate.

And how will Alexander accomplish all this? He has created the “*Sunrise Program*,” which is implementing many major projects and changes, including (but not limited to) the replacement of the current (old), corrupt fiat money financial system with a new, gold backed financial system for the world.

One component of the *Sunrise Program* is the creation of *Sovereign Cooperatives*. (See discussion on p. 1, below [including fn 3].) By joining a *Sovereign Cooperative* and helping to build the *Bright New World* people will be participating in the *Sunrise Program* and thereby substantially increase their chances of making it into that excellent new world.²

Components of the Sunrise Program

Some of the components of the *Sunrise Program* are the following:

- **Sovereign Cooperatives.** About 200 *Sovereign Cooperatives* have been created in countries around the world. Each cooperative gets funded with an enormous sum of the new gold backed money. These cooperatives will fulfill an important role by completely rebuilding society in a much better form after the collapse of the current fiat based financial system (and the world as we know it), which will happen soon.³
- **Ra Media.** Ra Media is the main regulator of the entire world media space. It has become crucial to have a centralized body that oversees and regulates media content to protect the interests of both consumers and content creators. The primary goal of *Ra Media* is to safeguard the integrity of media content and ensure that it adheres to legal and ethical guidelines.
- **Gold backed reserve currencies.** The *SunRise Program* includes three gold backed reserve currencies for the world: the Golden Soviet Ruble, the Golden Pecunia and the Golden Dollar. Each unit of each of those currencies is backed by one gram of System Balance Banking Gold RA M0 M1 (XAU).

¹ The “powers-that-be” are the super rich, Satanic people who exert great influence and control over entire nations from behind the scenes. Such people would include the Rothschilds, the Rockefellers and others.

² The old financial system will collapse soon. Then the new, gold backed system will replace it. But there will be a difficult transition period and many people will not make it into the *Bright New World*.

³ More information about these *Sovereign Cooperatives* and how to join one can be found in an article titled *Overview: An Extraordinary Leader has Arisen to Lead Humanity into a Golden Age*, pp. 2-4 (including fn 4). A link to that article can be found on the homepage of the website: www.firstamendmentcafe.com.

- *GoldenEra Blockchain.* This is a decentralized, asset-backed digital financial infrastructure created to support *Program Sunrise* and guide the global transition from fiat instability to a system grounded in real, sovereign value. Only verified real-world assets – such as gold, commodities, and reserves of *Sovereign Cooperatives* – may be tokenized on the *GoldenEra Blockchain*.
- *Suncoin.* An asset backed crypto coin called *Suncoin*. Each *Suncoin* token is backed with 0.25 grams of System Balance Banking Gold RA M0 M1 (XAU). *Suncoin* is the native token of the *Golden Era Blockchain*. *Suncoin* will function as a basic means of facilitating transactions between and for the *Sovereign Cooperatives* in the *Sunrise Program*.
- *Sunpay.* A new payment system called *Sunpay* which allows people to send money anywhere in the world. (This system is completely separate from the current VISA / Mastercard / American Express / SWIFT system.) This payment system can be used as a debit card or an app on one's phone.
- *GoldenEra Scan.* This is the official blockchain explorer for the *GoldenEra Blockchain*. It is an easy, transparent, and reliable way to see what's happening throughout the blockchain.
- *GoldenEra Exchange.* A decentralized crypto currency exchange which will enable seamless trading between *SunCoin*, other *GoldenEra Blockchain* based asset-backed tokens, and other digital assets. This ensures liquidity, transparency, and global interoperability.⁴
- *GoldenEra Wallet.* A new, secure crypto coin wallet called *GoldenEra Wallet*.
- *More.* There are a number of other components of the *Sunrise Program*.

(There is much more to say about the *Sunrise Program*. A more detailed discussion of the components of that program can be found in a report titled: *The Sunrise Program and the Global Financial System*. Click [here](#) to read it.)

Conclusion:

As evidenced by the above points, the *Sunrise Program* is a comprehensive program designed with the full intention of replacing the current fiat based financial system with an entirely new and better gold backed financial system. Through the *Sunrise Program* a *Bright New World* is now being created which will be superior to our present world. One can substantially increase one's chances of entering the *Bright New World* by joining a *Sovereign Cooperative* and helping to build that excellent new world.

//////////**END**//////////

⁴ Note that all of these gold (or other asset) backed crypto currencies, gold backed paper currencies, *SunPay* payments, and gold backed reserve currencies will be readily interchangeable.
