

MANIFESTO | Version 12 June 2025 (ENG)

Preamble of Universal Climate Declaration
*"The convergence of
Purpose & Actions for All in XXI"*

**Official Publication of Signatories Total Number,
@WSF 2025, 12 Dec,
for Paris Agreement 10th Anniversary**

MANIFESTO | CALL TO SUPPORT & CO-SIGN
The Preamble of "UNIVERSAL CLIMATE DECLARATION"

From October 12 to December 12, 2025, we are celebrating 10 years of the Paris Agreement around the world. To "Make Paris Agreement Great" :

- Confirm your commitment to re-insure this major treaty for Climate & Sustainability
- Consolidate your actions to be translated for a NetPositive planet

The start of the Year 2025 has already been one of the most worrying and unprecedented setbacks in terms of climate change, sustainable policies, and more broadly science. Considering that we already need to triple climate finance actions per year until 2035 to better adapt globally, While we are already on the way to COP30 Belem Amazonia, we want to raise collective responsibility, for this mid-century. For this significant and symbolic year, we want to help secure and translate the Agreement in greater depth. This is why, through the citizen prism, we call on individuals and organizations to: Simply turn the tide, using common sense I Be collectively the Consciousness Support.

It is now your turn to act to:

- Consolidate the Climate Treaty Officially, Symbolically and Responsibly
- Give current and future generations a chance to have the capacity to better adapt to climate change, and by safety path, where we pledge deeper to create:
 - the World Climate Bank to accelerate solutions transfer (reduction and adaptation).
 - the GeoEngineering Governance for international framework of usages & regulations, to avoid a collective jump into an uncontrolled global "5th Season" for the future.

This is why, from October 12 to December 12, 2025

- We organize the "Universal Climate Declaration" Preamble Pledge (on/offline)
- Join us now to collectively reach the goal of critical Willingness Supporters by number!
- Perhaps Many Top Leaders could come on this date, symbolically and officially, in conscience.

In the meantime, we just need to maintain the "Olympic" Spirit for sustainability and Common Good!

- **Make PARIS 2025** for the Climate a renewed energy and inspired by **PARIS 2024!**
- **Make PARIS AGREEMENT Great!**
