Take a trip down memory lane that will make you feel nostalgic af Amazon's new Lord of the Rings series is far from produced, but already information is trickling down about a possible big episode to count on season 1. Amazon recently showed in a behind-the-scenes video called Fellowship, introducing a creative team working on the upcoming series. One of the fellowship members, Tom Shippy, is considered a Tolkien scholar. He will help adapt the work of J.R.R. Tolkien for the show. He let slip information on the highly anticipated series in a recent interview. The upcoming season of The Lord of the Rings will have 20 episodes of Shippy attended in an interview with Deutsche Tolkien about the upcoming show. He said he doesn't know much, though it sounds like he may know more than he allows. It does, however, show that the series will have an initial 20 episodes. He told about it, talking about the filming locations. The exact locations are certainly uncertain, and this may well be somewhat, explained Shippy. The shooting itself does not take place in chronological order, but is focused on the location. It is logical that you try to link all the scenes that happen in one place and shoot them so that you have done so and do not have to return to this place several times. But it also means that everything should be clear at the beginning of filming, you need to know the end. There should be 20 episodes for the first season. So until they decide what the end is going to be, they can't start shooting. When will production begin in Season 1? Shippy also talked about showing in 2021, so production probably won't start this year. When asked about when production is likely to begin, he wasn't entirely sure how there's still so much to be done to prepare for the epic series. No, I know very, very little about the project anyway, Shippy said. As far as I know, they want to start showing it on TV in 2021, so I don't think production can start this year, although I don't know what their schedule is. There is still a lot to do, just think about costumes, guns, places, etc! The series has its first cast of Markella Kavanagh/Getty Images for AFI According to The Hollywood Reporter, Australian actress Markella Kavanagh has been cast in the upcoming series. She is the first person to reportedly sign. Reports indicate that she will play a character named Tyra on the new show. The series is set to be enormous, as Amazon paid \$250 million for rights to The Lord of the Rings in a deal with Tolkien Estate, published by HarperCollins and New Line. When will the series be set in Middle-earth? The series is set in the second century of Middle-earth, which includes a lot of interesting material for the creators of draw The Rings of the Force were created at this time, and Lord Sauron comes to power. The series is already set to have a multi-season commitment with Amazon and will air globally on Prime Video. J.D. Payne and Patrick McKay are developing this story. J.A. Bayona will also direct the first two episodes. Bayona and his production partner, Belen Atienza will be the executive producer of the series. Fans will wait a little longer to finally see the epic production of The Lord of the Rings. HBO SPOILER ALERT for Game of Thrones Season 6, Episode 3, Oathbreaker Jon Snow's Sunday cliffhanger is a tough act to follow, but Game of Thrones has done a fine job of picking up the backup. Here's the main takeaway from today's episode, Oathbreaker. (If you need to brush yourself up with what happened last week, check out our summary.) 1) Jon Snow lives and he remembers everything. While gasping his way to life, Jon Snow looks at his wounds, remembering that he was stabbed. Ser Davos and Melisandre turn with surprise and find him sitting upright. Snow doesn't understand why he's resurrected (he tells Davos, I shouldn't be here and I failed, to which Davos replies, Failed again), but Melisandre may have an idea. The Lord brought you back for a reason, she told John, adding that Stannis Baratheon was not the prince who was promised, but someone must be. Perhaps she begins to believe that it is Azor Ahai, who is destined to rule? 2) Gilly is going to meet with Sam's family. This is the first time we've seen a couple in season 6 and they're on board the ship (which Sam's stomach doesn't appreciate). Gilly thinks they're heading to Oldtown, but Sam reveals that since there's no women or children, and it would be dangerous for her, he's actually taking her to his hometown of Hornhill. There she can stay in the service of his family. Although his father is tough, he assures Gilly that his mother and sister will be kind to her. Gilly now also considers Sam the father of his son. 3) Bran goes back in time again and wants to stay there. As in last week's episode, Bran watches his father in his youth. This time he travels with a pack of men, one of whom is Mira's father, Howland Reed. Ned is greeted on top of a hill at the foot of the tower, which is not named, but it seems to be the Tower of Joy, where his sister Lianna was saved and supposedly died. Ned asks the guards: Where's my sister? and they fight with the sword. If you look closely, the guards of Targaryen sigils on their armor, which is consistent with the story that the kidnapper Lyanna (or lover) Rhaegar Targaryen kept her in the tower protected kingsguard. When the knights are killed, the woman screams from the top of the tower and Ned begins to take the stairs. Bran also wants to go and shouts to his father. Ned seems to hear and turns around, but No problem. The raven forces Bran to abandon the vision and warns, Stay too long where you don't belong and you will never come back. 4) The fate of Halishi will be decided for her. Daenerys finally joins

the wives of the dead halal, but did not meet a warm welcome. Arriving at the scene, she lost her clothes, got a ragged robe and mocked the matriarch Dosha Khalin, the widow of Hala Soro. Daenerys demands to leave, but the woman tells her that the incoming caravan of halasarov will decide where she will go, if she leaves at all. 5) The Masters are back on the rise. Daenerys may have freed the slaves in her conquests, but the deposed masters have returned to the ascended and are looking for revenge, which may be easier for them now that Halishi has left. Masters Of Astapor, Yunkai and Volantis are all funding Sons of Harpia to wreak havoc on the Meereen-big battle may be in store. Vaios meets a woman named Vala, who helped the Sons of Harpia kill the Untainable and Second Sons. Now that she has been charged with conspiring to kill the queen's soldiers, she could face death. But Barist, snu bit as he is, bribes her with a bag of silver and a chance to start a new life with her son. While they wait for his return, Tyrion awkwardly plays the third wheel of Missandei and Grey Worm. 6) Cersei now has control over Lord Varys' small birds. Sneaky Lord Weiss is known for having ears all over the place thanks to his network of little birds throughout the Seven Kingdoms. In this episode, we learn that his birds are actually little kids who spy around to discover secrets for him. He called us his little birds, the boy told Sibern at the Royal Landing. Then, Sibern bribes the children with sweets, as Weiss did, to come back and tell him whisper. Cersei tells him that she wants spies everywhere from Dorne and High Garden to the north so she can know what everyone is saying. Although she now has these spies, Cersei may not return to the Small Council. He and Jaime are trying to cut the meeting, but to no avail. Meanwhile, Tommen, who intended to persuade the High Sparrow to free his mother from repentance, has a heart-to-heart with a priest. So much for this backbone we were hoping for. 7) Arya sees again. Despite being from the street and back to the House of Black and White, Arya continues to train and stick to fighting Waif to truly become nobody. After mounting beatings and interrogations, she is finally able to defend herself in a fight, even while blind, reminding us that she is still a bully we fell in love with. After a sip, she gets her vision back.8) Ramsay Bolton has her next victim: Rickon Stark. Lord Umber, head of a neighbouring house in the north, Ramsay's visit to Winterfell to ask for help in dealing with potential attacks has run wild. (Umber already knows that Ramsay killed his father, although Ramsay still insists that Rousey died of poison.) Instead of swearing allegiance to Ramsay as the warden of the north, Umber offers Ramsay a gift: Osh, a freed wild woman who befriends Stark's children, and Rickon Stark. He even brings the decapitated head of a werewolf, Rickon, Shaggydog, to prove the boy's identity. Umber hints that Rickon is a gift for Harald Karstark, who is present on the stock exchange. Karstark's father was killed by Robb Stark, despite family unions. If he still wants revenge, he can now take him to Rickon. That poor boy. 9) Jon Snow finishes his watch. In the final minutes of the episode, Snow hangs up his four killers, including a young Ollie, whom he seems hesitant to let go of. When the case is done, he hands his cloak and black lock to his friend Addison Tollett. He storms (sports man bun, note) and says: My hours are over. The fall of the microphone. You may be able to find more information about this and similar content on piano.io as unsexy as an episode length of Game of Thrones can seem, these minutes and hours show a ton of what to expect come April 14 and beyond. Okay, maybe not a ton, but more than those pictures everyone staring at the sky did. Here's the launch time (each episode airs Sunday on HBO at 9 p.m. E.T.): April 14 (premiere): 54 minutes. April 21 (episode 2): 58 minutes. April 28 (episode 3): 1 hour 22 minutes. May 5 (episode 4): 1 hour 18 minutes. May 12 (episode 5): 1 hour 20 minutes. May 19 (episode 6, series finale): 1 hour 20 minutes. What do they tell us? Holiday Eyes on Episode 3, airing April 28. I'd star the one. Not only is it an absolute long bunch of two minutes, it is believed to be the infamous episode of Battle of Winterfell. Vladimir Furdik, who plays the Night King, offered the same amount during a conversation with fans in December 2018. In the third episode of last season, there is a battle that the creators intended to be a historical moment on television, said Furdek, according to Wrap.If Furdek was telling the truth, it only makes sense for Thrones to give the as-yet unnamed third episode some extra attention. So, be prepared to stew in any tragedies befall Westeros during three extremely long television episodes. Tv.
