Scott Cawthon Android 2.3 - 1.07 \$0 5 nights on Freddy's 2 (MOD, Unlocked) - 1.07 \$0. You will play a watchman who monitors what is happening with the help of cameras. But at night begins to happen inexplicable, the cameras will turn off themselves, all exhibits will come to life and you will need to go out and repair broken cameras. You have to withstand all the tricks and traps of exhibits. After all, if you hold out for 5 days you will win the game. Confirm your email to ensure sharing. Having trouble? x We are experiencing interruptions in the delivery of e-mail. If you do not receive emails from us, please try after 8am EST. x 1 Start a new game or open saved games. This cheat lets you immediately go to 6am any night, so it really doesn't matter where you start. 2 Find a poster on the left wall of the office that depicts Bonnie, Freddy and Chick. It's under some wires that hang on the ceiling and says: Celebrate! At the bottom. 3 Move the pointer so that it covers Freddy's nose on the poster. Cheating won't work if your cursor is elsewhere. You don't have to hold the mouse button down, just make sure the cursor closes your nose. 4 Click buttons C, D and q to automatically survive the night. It is important to note that this will only work if you have a number pad on the keyboard (number and character keys that are installed to the right of the other keys), so you can click the actual I key. It won't work if you have a smaller keyboard and have to press shift and key at the top of the keyboard (next to the removal key). 1 Close any open games you may be running. This won't work if FNAF2 is open. 2 Open race (keypressWin) AR) and will enter %appdata%. This will lead you to a folder that contains app settings and data files that are connected to apps on your computer. 3 Open the Roaming folder. There will be a lot of files in this folder - the one you want is a folder called MMFApplications. Find it by scrolling through the files or click Ctrl-F and enter the MMFApplications in the search bar. When searching for MMFApplications, open the folder. 4 Find the freddy2 file and click the right button on the file. Choose Open with from a pop-up menu and choose a notepad. 5 Erase the contents of the file and enter or paste the following code to unlock the game: beatgame'1 beat6'1 cine'1 level'5 turn 2 c10 1 c9'1 c 8'1 c7'1 c6'1ggf c5'1 c4'1 c3'1 c2'1 c1 6 Save file, and then open the game to play. You Now have access to Custom Night and Night 6. You'll also have all plush and all three stars. 1 Download the application management tool to your computer. This will allow you to access and change the system files on your phone. Try iFunbox, which is free and can be downloaded from the Internet. 2 Connect the device to your computer. Make sure the game doesn't work or the hack won't work. 3 Open the app management program and select Apps for users. This will show a list of all the apps on your phone. Scroll down until you find five nights on Freddy 2 and double click to open it. 4 Open the Documents folder and look for a file called freddy2. Click the right button on the file and select Copy on Mac. Keep it on your desktop so you can find it right away. Open the freddy2 file on your desktop. Remove what's written there (it'll just tell you what night you are currently). To unlock everything in the game (user nights, 5 bitheims1 beat61 cine1 level5 turn 2 c101 c91 c81 c71 c61 c5'1 c4'1 c3'1 c2'1 c1 6 6 Save the file and close it. Then drag it back to the app management tool (you still have to have a Folder of Documents open to FNAF2) and it will replace the old freddy2 file. 7 Open the game. It will show that you are in the night six and you must have three stars. You'll be able to access all the different custom nights like Ladies Night, Cupcake Challenge, Golden Freddy, and more. 1 Open FNAF 2. Stay on the main menu while you take this step. 2 Press Keys C, D, and 2 all at the same time. 3 Play night 7 or 6. You may not have all the teddy at your desk or miss out on the fifth night, but you can play the 6th and 7th nights while cheating without Step 2. Add a new question question How can I call Golden Freddy in five nights on Freddy 2? Golden Freddy doesn't work the same way as Freddy's five nights. In five nights on Freddy 2, it is an actual A.I.-controlled character that comes on Night 6, and has a variable A.I. on a custom night. The question is how can I get rid of Mangle in five nights on Freddy 2? First, you need to know if it's there. It should make noise like a police scanner in the air vents. Put the mask on until it stops, and mangle the leaves. If you don't, it can jumpscare you either immediately, or later in the game. The question is, who are all the characters? There are the original four now known as the withered Freddy, the withered Bonnie, the withered Chick, and Foxy. Toys Toy Freddy, Toy Bonnie, Toy Chick, and Mangle. There is also a puppet, a balloon boy and a Golden Freddy. The question is why in five nights at Freddy 2, not a balloon boy does not move? He does, and even if he doesn't jumpscare, it will work to eat all the batteries of each light source if you don't put on a mask mask when he's in the left vent. When asked when I try to open the FNaF2.mfa file he says: Unknown format failed to open the document. What can I do? Try overworking the game or installing it on a new source like Mediafire or Mega. The question is how can I get Five Nights at Freddy's Cheats? Cheating for 1 and 2 signals Freddy's nose on the Celebrate poster, then press and hold C, D, then. If you have a keyboard with a keyboard to the right of the letter key, click the yu key in the far right. It will automatically run the 6 AM screen. The question is will this work on the iPod Touch? Yes. Any device with an iOS operating system will work. The question is, what happened to the Toy Chica beak? Go to YouTube and see Game Theorists. Watch their video on FNAF (Dream Theory). The question is how can I operate this hack on an iPad? You're running this hack on the iPad just like the iPhone. Get iFunbox on your computer, connect your iPad to your computer (using a USB cable from your charger), and then just follow the other steps. The question is does this hack work on the iPad? Yes.
