It takes a few minutes to review our full safety information in Box Contents Fitbit Charge 2 package containing: Bracelet screen charging cable the upper and lower ones can be exchanged for other colors and materials sold separately. Our content will help you get started quickly by creating a Fitbit account and ensuring that the screen can transfer the collected data to your Fitbit control center. Control Center is where you'll set goals, analyze historical data, identify trends, record food and water consumption, track your friends, and more. Once you're done setting up your screen, you're ready to start the migration. Next, we'll explain how you can find and use features that interest you and adjust your preferences. For more information, tips, and troubleshooting, see our detailed article on help.fitbit.com. 1 7 Fitbit Charge 2 Setup To enjoy a better experience, we recommend using the Fitbit apps available for ios, Android or Windows 10. If you don't have a mobile device, you can also use a Mac computer that supports Windows 10 or Bluetooth. For alternative options for Bluetooth, visit help.fitbit.com. Your Fitbit account will ask you to provide some data such as your height, weight and gender to perform various calculations, such as stride length to estimate travel distance and basic metabolic rate to estimate calorie intake. You have the option to share your age, height or weight with friends on Fitbit, but the information you provide is private by default. Set up your mobile screen The free Fitbit app supports more than 200 mobile devices that support ios, Android and Windows 10 operating systems. To begin with: 1. Make sure that the Fitbit app is compatible with your mobile device by browsing 2. Find the Fitbit app in one of the following locations, depending on your device: the Apple App Store for iOS devices like iPhone or iPad. The Google Play Store is for Android devices such as the Samsung Galaxy S5 and Motorola Droid Turbo. The Microsoft Windows Store is for Windows 10 mobile devices, such as your Lumia phone or Surface tablet. 3. Install the app. Keep in mind that if you don't have an account in the store, you'll need to create one before you can download the app. 4. When the app is installed, open it and tap Join Fitbit for guidance through a series of questions that will help you create a Fitbit account or sign in with your account. 5. Continue following the on-screen instructions to connect or pair Charge 2 with your mobile device. Pairing ensures that monitors and mobile devices can communicate with each other (synchronize data from one monitor to another). pair, read instructions about your new screen, and then explore the Fitbit control center. Set up your desktop on a Windows 10 computer If you don't have a mobile device, you can set up and sync your screen using a Bluetooth-enabled Windows 10 computer. The same Fitbit app available for windows 10 mobile devices is also available for your computer. To get the Fitbit app for your computer: 1. Click the Start button on your computer and open the Windows Store (called store). 2 8 2. Search for the Fitbit app and when you find it, click Free to download it to your computer. 3. If you've never downloaded an app to your computer, you'll be asked to create an account in the Windows Store. 4. Click on your Microsoft account to sign in with your Microsoft account. If you don't have a Microsoft account yet, follow the on-screen instructions to create a new account. 5. Open the app when you're done downloading. 6. Click Join Fitbit for guidance through a series of questions that will help you create your Fitbit account or sign in with your account. 7. Continue following the on-screen instructions to connect or pair Charging 2 with the Windows 10 app. Pairing ensures that monitors and apps can communicate with each
